SWEET
HEARTS

HOW TO MAKE THIS PAPERCRAFT

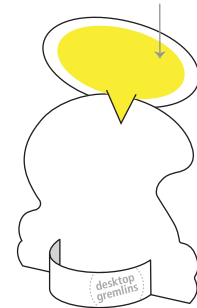

INSTRUCTIONS: Trim out the pieces with scissors as indicated. Then make cuts on the color-coded assembly slots (pointed out by the ► symbols.) Roll the “base” piece into a loop-type shape and secure by sliding the two GREEN slots into each other. (Loose ends and color-coded assembly lines stay INSIDE the loop.) Then insert the “character” piece into the base by aligning the corresponding BLUE slots.

BUT WAIT!

DOES YOUR PAPERCRAFT HAVE SOMETHING TO SAY?

To cut out the speech bubble, first make two cuts on the ORANGE lines to form its “pointer.” Then cut around the bubble (taking care not to cut off the pointer in the process). Personalize the bubble and attach as shown!

TAKE A PHOTO OF YOUR WORK!

The world wants to see just how creative you really are! What is your heart doing? What amazing, peculiar, or bizarre location did your heart find itself in? What loving, witty, or clever thing is your heart saying? Take a photo of your completed papercraft and share it to your favorite social network using the #DesktopGremlins hashtag!
