

**Tools Required:** Flathead screwdriver, Phillips screwdriver, pliers, wire cutters, wire strippers, electrical tape, safety glasses.

**Bulb Recommended:** (5) Medium Base Decorative Filament 60W bulb (provided), Maximum 100W, Alternate bulb (5) 23W CFL Maximum.

**Estimated Assembly Time:** 20-30 minutes

**Preparation:** Identify and inspect all parts before beginning installation. Check package content list and diagrams below to be sure all parts are present. If any parts are missing or damaged, do not attempt to assemble, install, or operate the fixture. Contact customer service for replacement parts.

### ⚠ Warnings and Cautions

Turn off electricity at circuit breaker or main fuse box before installation. Consult a licensed electrician if in doubt.

These instructions are provided for your safety. It is very important you read them completely before installing the fixture. We strongly recommend that a licensed, professional electrician perform the installation.

Disconnect fixture from power source before replacing bulbs. Make sure bulbs are given sufficient time to cool before removal. Do not subject glass parts to any shock while in operation or shattering may result.

### Package Contents

### Hardware Contents

### STEP 1 - Assemble Rods, Fixture Loops and Ceiling Canopy

- Determine the Rods (B/C) to be assembled to the Socket Assembly (A) according to your hanging height.
- Pass the supply wires and ground wire through the chosen rods (B/C) and one Fixture Loop (FF). Thread the Socket Assembly (A), the chosen Rods (B/C) and the Fixture Loops (FF) together. Hand tighten until snug.
- Pass the supply wires and ground wire through the Ceiling Canopy (HH). Attach the Fixture Loops (FF) to Ceiling Loops underside of the Ceiling Canopy (HH) with Quick Links (GG).

Suggested rods for Ceiling height :

- 8' ceiling : use (1) 6" rod and (1) 12" rod
- 9' ceiling : use (1) 6" rod and (2) 12" rods
- 10' ceiling: use (2) 6" rods and (2) 12" rods

A

### STEP 2 - Install Crossbar

- Attach the Crossbar (AA) to the Outlet Box with the head of the Green Ground Screw facing you. Secure it with Outlet Box Screws (not included). Tighten until snug.

Figure 2

### STEP 3 - Install Nipple to Crossbar

- \* Pliers is required for this step.
- A. Thread Hex Nut (CC) to the middle of the Nipple (DD). Place the Lock Washer (BB) over the Nipple (DD) and then thread the Nipple (DD) into the Crossbar (AA) until the Nipple (DD) is about 0.375"

Above the Crossbar (AA). By using pliers, thread Hex Nut (CC) against the Crossbar and hand tighten until snug.

Figure 3

### STEP 4 - Attach Lanyard

- The purpose of the lanyard is to provide the installer a means to support the fixture from the junction box while connecting the electrical wires. This enables the fixture to hang from the junction box and your hands are free to make the wire connections.
- Turn the Button Stop so it may be inserted into the Inner Backplate slot. Make sure the Button Stop is completely inside the Inner Backplate. Slowly release the fixture to make sure it is supported by the Button Stop. Proceed to the wiring steps in the next step. Once you are complete with the wiring there is nothing to do with Lanyard. The Lanyard will push into the junction box when the fixture is placed for final mounting.

Figure 4

### STEP 5 - Wire Connections

A. Use standard wire connectors (not included) to make all wire connections. (Connectors are not included with fixture.) Twist connectors until wires are tightly joined together. Wrap each connection with approved electrical tape and carefully stuff all the connected wires into outlet box.

Note: If the electrical wire is going to be cut shorter than provided you will need to identify the "L" line wire and the "N" neutral wire before you cut the excess wire off. One is labeled N and the other labeled L. To do this separate the "L" line wire and the "N" neutral wire as far as you need to. Re-label the wire near where you want to make the cut. Be sure to mark the wire on the side of the fixture and not on the excess wire being cut and removed.

### STEP 6 - Install Ceiling Canopy to Crossbar

A. Attach the Ceiling Canopy (HH) over the end of the Nipple (DD) and secure with the Hex Nut (CC). Hand tighten until snug.  
B. Thread the Finial (EE) onto the Nipple (DD) and hand tighten until snug.

### STEP 7 - Install Bulb

A. This fixture uses Medium Base Decorative Filament 60W bulb (D), Maximum 100W. Insert bulb and screw snugly into place.

Your fixture is now assembled and ready to use. Enjoy!
