

SHEEP RANGE

LambGro®

LambGro® is a nutritionally balanced 4mm pellet containing the necessary energy, protein, calcium and phosphorus to maximise lamb growth and increase survival rates.

Features

Benefits

Nutritionally balanced ration	> A balanced formulation designed to meet the high nutritional demands of early-weaned lambs
High protein ration	> Optimal protein level for growth and development of early-weaned lambs
Quality assured vitamin/trace	> Provides all the essential vitamins and minerals to meet the high nutritional demands of rapidly growing lambs
Effective fibre	> Sufficient fibre which aids in the prevention of acidosis
Contains Bovatec 150 (lasalocid sodium)	> Stabilises rumen bacteria to improve feed efficiency and reduce faecal shedding of coccidian parasites
Molasses added	> Increases palatability and feed intake
4mm Pelleted feed	> Can be fed out in adjustable lick feeders to reduce wastage and ensure there is no spread of weed seeds
Raw material receival standards	> High quality and safety of ingredients
Optimal value	> Maximised lamb growth and survival rates

NUTRITIONAL ANALYSIS

Crude Protein (min)	16.0%
Metabolisable Energy (min)	12.0MJ/kg
Crude Fibre (max)	15.5%
Calcium (min)	1.5%
Phosphorus (min)	0.35%
Vitamin E (added)	75mg/kg
Selenium (part organic)	600µg/kg
Potassium	0.7%
Lasalocid Acid	30.0ppm

INGREDIENT SELECTION

Cereal grains, lupins, cereal by-products, cereal straw, canola meal, limesand, dicalcium phosphate, molasses, salt, vitamin/trace mineral premix, lasalocid sodium

FEEDING DIRECTIONS

LambGro® is designed to be fed ad lib to lambs from 9 weeks of age. Hay or straw should be fed for the first week. It can be fed safely in adjustable lick feeders.

LambGro® increases the bodyweight of young lambs resulting in heavier lambs available for sale. LambGro® is also suitable for ewes & rams in preparation for joining, together with being a nutrient dense feed available for pregnant or lactating ewes.
