

Because keeping you safe is our top priority...

Please take a moment to read through the following care and use instructions for your new bucket tool bag.

We care a lot about your safety and satisfaction. That's why we've put together a few precautions for you to follow while using your NoCry bucket tool bag.

- The bucket tool bag is designed to fit 3 and 5 gallon buckets. Please make sure the tool bag fits properly in the bucket you are using and the bucket is sturdy enough to carry and hold the tool bag when packed with tools.
- To prepare the tool bag for use, place it inside your bucket of choice with the slitted side pointing upwards. Align the slits on both sides to where the handle meets the bucket. Fold the top sides over and outwards while bringing the bucket handle up. Slide one side underneath the bucket handle so you can freely use the handle to carry the bucket.
- The bucket tool bag is made to be tear and abrasion resistant, but it is not fully cut or puncture proof. Make sure you don't place any sharp objects into the pockets without appropriate safety covers.
- When carrying the bucket with the tool bag equipped, be careful to not overburden yourself by carrying too many heavy tools and objects in the tool bag at once. Make sure to watch your posture so that you do not overstrain your body.
- When using the bucket tool bag around elevated work surfaces or when suspending it from a ladder or scaffold, always make sure the bucket is stable and balanced to avoid it from accidentally tipping over.
- You can remove minor dirt/stains from your bucket tool bag by using a soft brush. If the dirt/stains are stubborn use a washcloth and lukewarm water with a neutral detergent solution to clean it. Avoid using bleach and do not machine wash or iron / machine dry the tool bag.

If you have any questions or concerns about your bucket tool bag, feel free to contact our customer support at wecare@nocry.com. We're always here to help.
