

Because keeping you safe is our top priority...

Please take a moment to read through the following care and use instructions for your new hard hat.

We care a lot about your safety and satisfaction. That's why we've put together a few precautions for you to follow while using your NoCry Hard Hat.

- The NoCry Hard Hat is designed to protect your head from falling objects. Always examine its protective capabilities prior to each use to ensure the helmet is in good condition. It cannot offer complete protection against every hazard or injury, so always remain careful while working in areas that require you to wear the hard hat.
- When putting on the helmet, try adjusting the headband size using the dial ratchet until the helmet feels comfortable and snug on your head. Please bear in mind that the headband should not be fastened too tightly.
- The included elastic chin strap with chin guard can be attached to the hard hat to allow for a more secure fit. Always wear the chin strap when working on elevated work surfaces, climbing a ladder or scaffold, or working in areas with high wind speeds. Do not fasten the chin strap too tightly.
- Always be careful when assessing situations and environments where you are planning to use the hard hat. Make sure that the hard hat is the most suitable means of protection from potential threats you will be exposed to in your work environment.
- The hard hat is not fire or chemical resistant. Avoid storing it in environments with high temperatures or high humidity.
- You can remove minor dirt/stains from your hard hat by using a soft brush. If the dirt/stains are stubborn please use a washcloth in lukewarm water with a neutral detergent solution. Rinse with clean water afterwards. Never clean any part in a washing machine.

If the hard hat you received is not a great fit or you have any questions or concerns, feel free to contact our customer support at wecare@nocry.com. We're always here to help.

Assembly Instructions

Follow the steps below to assemble your Hard Hat.

1. Take all parts out of their original packaging and place them on a flat, soft working surface.

2. Install the suspension inside the hard hat by inserting the four hanger keys into the key slots. Slide each hanger key into their respective key slot and make sure they are firmly attached.

3. Ensure the suspension is securely installed inside the hard hat and all four hanger keys are placed inside their key slot. The adjustable dial ratchet should be at the back of the helmet.

4. Attach the chin strap to the hard hat by snapping the strap clips to the suspension connector slots.

5. Make sure the chin strap is securely attached to the suspension. Adjust the strap length to your preferred length.
