

Because keeping you safe is our top priority...

Please take a moment to read through the following care and use instructions for your new tool pouch.

We care a lot about your safety and satisfaction. That's why we've put together a few precautions for you to follow while using your NoCry Tool Pouch.

- The belt attachment loop opens and closes with Velcro so you can attach and un-attach the pouch to your belt quickly and conveniently. If you don't have a belt you can use the one provided with the tool pouch.
- While the pouch is tough, it's not entirely cut or puncture proof. Make sure you don't place sharp objects into the pouch pockets without appropriate safety covers.
- Do not overburden yourself with too many heavy tools in the pouch at once. Make sure to watch your posture while working so that you do not overstrain your body.
- You can remove minor dirt/stains from your tool pouch by using a soft brush. If the dirt/stains are stubborn use a washcloth and lukewarm water with neutral detergent solution to clean it.
- Do not machine wash or use hot water to clean the pouch. Avoid bleach (chlorine or peroxide) as this will discolor and damage the fabrics, edge binding and sewing thread. Avoid the use of alcohol or alcohol based products. Do not machine dry or iron the pouch. After cleaning, hang it to drip dry.

If you have any questions or concerns about your tool pouch, feel free to contact our customer support at wecare@nocry.com. We're always here to help.
