About the inventor...

MR G

Rob Gearing

Mr G has an extensive aviation background, however his passion lies in the outdoors - be it hunting, fly fishing or climbing. He has travelled to some of the world's most remote places with a rifle, rod or rope in hand - sometimes all three at the same time.

A passionate individual, driven to invent great gear that works just as well as it looks.

Welcome to the Spartan Family...

The Spartan Precision Equipment Ethos: design it right, use the best materials and listen to others.

With these objectives in mind, Rob set out to build the Spartan empire. Securing a world patent and working with a satellite design engineer, he launched the business and the Javelin Bipod version 1 was born, selling 3000 units in the first two years.

Adopting a reactive approach by listening intently to our customers' feedback has allowed the Javelin bipod to evolve into what it is today. This bipod has been a huge success, selling over 35,000 units to date. This success ignited the development of many more Spartan products, such as the Spartan Tent, Tripods and Trekking Poles to name a few.

Our products are now being used by the some of the top names in the hunting world and are regularly featured in many highly re-nowned publications. The Javelin is considered by many of its users to be 'the best hunting bipod on the planet.'

Today we are continuously working with some of the biggest and best rifle brands in the world. You only need to look at our website to see who we make bipods for, while our partner list is ever-growing.

We Spartans have been busy in the trench, locked in a system of designing, building, testing, redesigning and retesting until we are happy that we have achieved our goal. Here we present to you our first catalogue - it's been a long time coming!

We want our customers to be sure that they have the best products for their specific goals, and sometimes that requires talking over the phone. Please do not hesitate to reach out to us should you have any questions concerning our products.

As a hunter, Mr G became frustrated by the lack of innovation in terms of versatility and functionality of his equipment, and so he decided to do something about it. Returning to his climbing and aviation roots enabled him to decide on his priorities for his gear, these being:

Weight

Why carry anything heavier than it needs to be? Materials have improved but the industry has not taken advantage of this. For climbers and indeed aviators, this has always been a key driver.

Functionality

Design and create products to work in the real outdoor environment. This sounds simple, but in the world of hunting the ground is rarely flat and animals move quickly.

Strength

Never cut corners, and only use the best materials available. We could make things cheaper, but we cannot make them better. Build it as if your life depended on it!

Adaptability

Design and make tools that are able to adapt to the environment, cope with extremes in both weather and temperature, and ideally provide the user with more than one function.

How it works

- 1 | Unscrew your existing sling swivel stud
- 2 | Select the bolt with the thread that matches your old stud
- 3 | Use the provided allen key to fasten the adapter to your rifle stock
- 4 | Reattach your sling to the adapter
- 5 | Attach any Spartan support system to the adapter

Our adapters

Our adapters cover a broad range of rifle stocks and profiles, meaning you will not struggle to find a solution for your setup. We are always developing new solutions, so if your rifle isn't currently compatible it will be soon.

- 1 | Universal Rifle Adapter** Most traditional hunting rifle platforms.
- 2 | Blaser Universal Adapter** Blaser R8 & R93 series of rifles.
- 3 | Picatinny Adapter** For direct attachment to 'Picatinny' accessory rails.
- 4 | Universal Guide Adapter** Temporary fitting to under stock sling swivel stud fittings.
- 5 | UIT/Anschutz Rail Adapter** Direct attachment to 'UIT Rail (Anschutz)' accessory rails.
- 6 | M-Lok Rail Adapter** Direct attachment to 'M-Lok' accessory rails.
- 7 | Key Mod Rail Adapter** For direct attachment to 'Key-Mod' accessory rails.
- 8 | Sauer 404 Adapter** For direct fitting to the fore-stock of the Sauer 404 Rifle.
- 9 | Gunsmith Adapters** Designed to be bonded into wooden and synthetic rifle stocks

The **JAVELIN** LITE

The Javelin Lite uses precision CNC machining and high quality carbon fibre to produce an innovative, modular and highly effective entry level bipod system.

FEATURES

- 1 | Patented magnetic attachment system
- 2 | Built in rotation & adjustable cant
- 3 | Hard anodised 7000 aerospace aluminium
- 4 | Cross-weave multilayer carbon fibre
- 5 | Rubber and tungsten carbide feet
- 6 | Interchangeable and upgradeable leg system
- 7 | Available in three sizes: mini, standard and long
- 8 | Weighing only 132g/4.65oz (standard size)
- 9 | One bipod for all of your rifles

The
JAVELIN ORIGINAL

Made using only the best materials, the Javelin represents a major leap forward in the shooting game. A lightweight bipod that can be attached to your rifle in seconds.

FEATURES

- 1 | Patented magnetic attachment system
- 2 | Built in rotation and adjustable cant
- 3 | Hard anodised 7000 aerospace aluminium
- 4 | Cross-weave multilayer carbon fibre
- 5 | Extendable leg lock system
- 6 | Rubber and tungsten carbide feet
- 7 | Available in two sizes: standard and long
- 8 | Weighing only 148g/5.2oz (standard size)
- 9 | One bipod for all of your rifles

The PRO HUNT

The Pro Hunt offers a large number of real world advantages for the discerning shooter. Featuring a new two section leg, using our latest external locking system that keeps the locking action out of the dirt.

FEATURES

- 1 | Patented magnetic attachment system
- 2 | Built in rotation and adjustable cant
- 3 | Hard anodised 7000 aerospace aluminium
- 4 | Our latest external locking system which keeps the locking action out of the dirt
- 5 | Cross-weave multilayer carbon fibre
- 6 | Rubber and tungsten carbide feet
- 7 | New leg lock-out feature which keeps the legs open until they need to be closed with a single button press
- 8 | Interchangeable and upgradeable leg system
- 9 | Available in two sizes: standard and long
- 10 | Weighing only 176g/6.2oz (standard size)
- 11 | One bipod for all of your rifles

The SPARTAN 300

The Spartan 300 bipod builds on our experience and knowledge gained from making the Javelin bipod. It provides users that require an ultralight weight bipod with a solution. It can be fitted in seconds and then folded and locked under the rifle instantaneously.

FEATURES

- 1 | Patented magnetic attachment system
- 2 | Built in rotation
- 3 | Hard anodised 7000 aerospace aluminium
- 4 | Quick draw extendable leg lock system
- 5 | Cross-weave multilayer carbon fibre
- 6 | Rubber and tungsten carbide feet
- 7 | Can be folded and locked under rifle
- 8 | Available in two sizes: standard and long
- 9 | Weighing only 160g/5.6oz (standard size)
- 10 | One bipod for all of your rifles

The SENTINEL

The Sentinel is a system, calling it a tripod would understate its versatility. It is a complete shooting system for the passionate hunter and outdoor enthusiast.

FEATURES

- 1 | Provides super stable support for rifles, optics and cameras
- 2 | Patented magnetic attachment system
- 3 | Large range of articulation from the friction adjustable ball joint, making it suitable for shooting and observing over uneven terrain.
- 4 | Hard anodised 7000 aerospace aluminium
- 5 | Cross-weave multilayer carbon fibre
- 6 | Extensible leg lock system
- 7 | Rubber and tungsten carbide feet
- 8 | Available in three sizes: Woodland, Mountain and Mini
- 9 | Compatible with a range of outdoor accessories

Sentinel Accessories

Heavy Optics Adapter

The Heavy Optics Adapter has been designed to turn your Sentinel into a super stable optics platform in seconds. It is capable of supporting high magnification professional optics.

Snow Basket

The Snow Basket is designed to fit to the Sentinel legs. It provides added stability and grip in snowy conditions.

Pan Head Converter

The Sentinel Pan Head Converter uses a 1/4" or 3/8" thread, allowing you to connect your camera or attach your existing pan-head directly onto the Sentinel.

Trekking Poles

The Sentinel legs can be used as trekking poles in combination with our range of multi-tool Trekking Pole Handles.

Spartan Tents

Using your Sentinel as the frame for our tent adds even more functionality and a new dimension to the Spartan Sentinel System. The tent is available in two variants - the Spartan Green Genie and the Spartan Carbonlite.

Quick Shot Adapter

This functions like a traditional gun rest, allowing you to quickly take aim from a standing or kneeling position. It is made of tactile rubber, while the adaptor is magnetised for easy fitting to the Sentinel.

Quad/Pent System

The Sentinel can be upgraded into a Quad or Pent system using an upgrade kit. The added legs provide increased stability and accuracy for hunters looking to shoot at greater distances.

The **TITAN**

This is our answer to an ultra lightweight tripod with conventional features. It is sold with the Davros Head to provide a great system that can be used most effectively to glass with your favourite optics whilst providing solid stability for that crucial shot.

FEATURES

- 1 | Provides super stable support for rifles, optics and cameras
- 2 | Patented magentic attachment system
- 3 | Large range of articulation from the friction adjustable ball joint, making it suitable for both shooting and observing on uneven terrain
- 4 | Fold out leg system
- 5 | Backpack hook to increase stability
- 6 | Cross-weave multilayer carbon fibre
- 7 | Central column for fine height adjustment
- 8 | Four part adjustable leg

The DAVROS

The Davros head has been developed to allow you to convert other shooting support systems - such as Primos Trigger sticks and Tripods - to benefit from the Spartan quick magnetic attachment system.

FEATURES

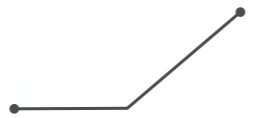

- 1** | Patented magnetic attachment system
- 2** | Provides super stable support for rifles, optics and cameras
- 3** | Large range of articulation from the friction adjustable ball joint, making it suitable for shooting and observing over uneven terrain
- 4** | Hard anodised 7000 aerospace aluminium
- 5** | Easy retro-fit option to the existing 3/8 unc threads found in tripod systems

Davros Accessories

Phone Holder

Designed to work with the optics adapter, Mr G Clamp and Pro Clamp, the Spartan Phone Holder will enable you to clamp your phone to almost anything.

Pro Clamp

The Pro Clamp can be used in a range of places such as High Seats, Tree Stands, ATV's, but with the added advantage of having the capability to handle even more situations. Both internal and external clamping is possible with the Pro Clamp. A pocket sized clamping device to support your rifle and/or optics in the most demanding of situations.

Mr G Clamp

Designed to work in conjunction with the Spartan Davros and Phone Holder, The Mr G Clamp is a true game changer supporting your rifle and optics in almost any situation. The Mr G Clamp can be used in high seats, tree stands, hides, or on cars and buggies.

Other Accessories

Spartan Multi-Tool

The Spartan Multi-Tool has a whole host of features. It can be used as a highly effective bow stabiliser, with the added bonus of having tools easily accessible to make adjustments. The Multi-Tool is also compatible with the Mr G Clamp and Davros providing extra height when required.

Bipod Holsters

Our bipod holsters are lightweight and durable making them a great addition to your Spartan kit. Available in leather or Cordura Classic.

Pro Legs

The Pro Legs have been designed to allow you to take seated, kneeling or standing shots with your Javelin Pro Hunt, Javelin Lite Bipod or Sentinel. The Pro Legs can also be used to increase ground clearance, allowing you to get above long grass, heather and bush. Available in three sizes.

Spartan Sucker Mount

The Spartan Sucker Mount is designed to attach to the body of a vehicle, providing a stable shooting platform when making shots from awkward angles.
