POOL GUARD EHB™ EPOXY HIGH BUILD the New Science of Epoxies™

Your pool gets attacked by chlorine, shock, UV sunrays, heat, cold, suntan oils, algae, slime, dirt, grit and people – it's time to even the score. **Pool Guard EHB™** is our two part High Build epoxy coating that will give a hard tile finish, and is designed for a perfect application even on an imperfect pool surface. 1:1 Mix Ratio gives a Heavy Duty Application unlike our competitors lower mix ratios. Silicone & UV Stabilizers act like a “sun block” giving extended protection against chalking, algae & fade.
