

Waiter Wallet® Free Templates

**EARN MORE
WAITING TABLES**

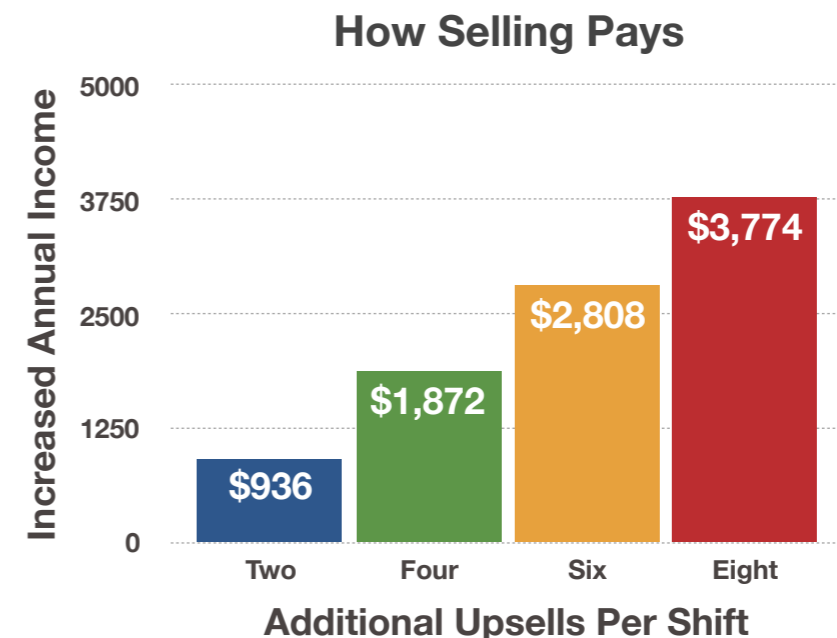

Know More. Earn More.

Let's be honest; waiting tables is selling. And, the more knowledge a waiter or waitress has, the more they, and their restaurant's benefit.

We do not mean a hard sell (or pushing the most expensive items). Instead, provide your guests with thoughtful suggestions and properly paired beverages that enhance the meal and their dining experience.

Knowing how to sell also increases how much money both the server and restaurant earn. This chart shows just how much money, pardon the pun; every server is leaving on the table.

If you want to see exactly how much you are losing, we have a great [Upsell Calculator](#) on our website.

Waiter Wallet® Templates

Nine On-Line Restaurant Cheat-Sheets

No one knows everything. So why not create a library of restaurant cheat-sheets to help, even the best waiters and waitress, know more? Well, we did it!

Unlike check presenters, the Waiter Wallet's patented design perfectly positions our invaluable, money- making guides at the server's fingertips (and away from the guest's eyes).

Waiter Wallet perfectly positions money-making templates at the server's fingertips.

Waiter Wallet patented design discreetly hides its contents from restaurant guests.

Waiter Wallet® Templates Instructions

1. Select one of our [nine Free Templates](#)* and click, '**Customize This Template.**'
2. Choose your version of Waiter Wallet from the **Template Size** dropdown menu.
3. Click in the empty fields to type in the information from your menu.
4. Choose **Save** if you plan on editing the template in the future. Then, type in a name and click **OK.**
5. Click **Print** on the left and a 4-up PDF is download to your device.
6. To edit a previously created template, go to that template and, in the dropdown menu below the dotted line, select the name and click the refresh button.
7. The **Reset** button clears all text entered into the template
8. Print the PDF on your printer.
9. Cut out the templates (or use the [Waiter Wallet perforated sheets](#)) and insert the printed templates into the [Waiter Wallet](#) or [Clear Pocket Insert](#) for easy reference.
10. Go to the bank and deposit all the extra money you are making.

Our on-line template software interface makes creating restaurant cheat sheets fast and easy.

Bar Notes Template

A comprehensive list of all your restaurant's bar drinks and their prices.

Like many of our templates, almost all of the content is customizable. In addition to the drink fields, the name and category content is also customizable. So, if you only serve wine, you can change the fields to, for example, styles of wine, and list six wines for each style.

You can even change **any** template's colors to match your restaurant or personal preference.

We think it is best to think of our templates existing format as a guide. Then let your menu and imagination create something that works best for your restaurant.

PRO TIP | Once completed, save and name the template for fast and easy future editing. For example, if a 'RED WINE' changes, you only need to edit that line and reprint.

NOTE | All information is saved to your computer so, resetting a browser could delete your content.

Daily Specials Template

All the daily information servers need to know, including daily specials and eighty-sixed items.

While the date is auto populated, all the other information is entirely editable.

Now at the pre-shift, servers can be more focused on what is being said rather than consumed with scribbling down hard to read notes

PRO TIP | Waiter Wallet’s perforated sheets are great for fast, easy distribution of templates to staff. Just fold, tear and hand out the template.

Allergies Template

Allergy	Salad	Apps	Steak	Farm	Ocean
Milk 					
Peanuts 					
Shellfish 					
Tree Nuts 					
Eggs 					
Fish 					
Soy 					
Wheat/ Gluten 					

Don't slow down the kitchen with allergy questions. This life-saving template informs servers exactly what dishes have which allergies and what dishes can be modified to eliminate the allergen.

Our grid template design allows servers to instantly and accurately guide guests to provide an enhanced dining experience.

Segment this template's courses (at the top) to fit with your restaurant's menu. Then replace our headers with whatever text works best for your menu.

PRO TIP | Place an Asterix (*) after any allergen that can be made without it. Now servers can immediately address a guest's allergy concerns.

NOTE | Use abbreviations to increase the number of dishes displayed in each template text box.

LINK | [Allergy Template](#)

Bottle Wine Template

Transform that extensive, overwhelming wine list into an easily digestible list that helps servers sell wine and expand their wine knowledge.

The template provides space for eight categories of wine and three bottles for each category. In addition to the wine's name, you can include critical tasting characteristics, price, region, and more.

For each category, we suggest selecting an inexpensive, moderate, and expensive bottle. Additionally, replace the proteins in the headers with entrees from your menu for pairing suggestions.

PRO TIP | When two or more guests order a similar wine by the glass, suggest a comparably priced bottle. It can be a better *value* assuming bottle pricing is calculations on a four glass pour, not the five they contain. And, guests can experience a better or more select wine.

NOTE | While this is a 'Bottled Wine' template, it can be equally effective for beer, Sake, or anything that you want. You can also change the blue category lines color if you prefer one long list.

LINK | [Bottle Wine Template](#)

SAUVIGNON BLANC: Chicken, game, hens, turkey, veal

CHARDONNAY: Chicken, pork, veal, turkey, spicy sausage

RIESLING: Pork, prosciutto, sautéed chicken

PINOT NOIR: Duck, lamb, pheasant, pork chops, salmon

SYRAH: Grilled meat, wild game, beef stew, rich meat

MERLOT: Beef, steak, grilled meat, hamburgers

CABERNET SAUVIGNON: Beef, leg of lamb, game, birds, venison

Tip-of-the-Day Template

In addition to the daily specials and eighty-sixed items, this powerful template allows management to reinforce key restaurant policies, training concepts, or best practices to their FOH serving staff.

We suggest discussing the 'Tip of the Day' at pre-shift. Then, this helpful content is reinforced every time servers open their Waiter Wallet.

PRO TIP I Enter 'Tab' to quickly move between fields on this or any Waiter Wallet template.

Wine Pairing Template

Pairing wine with food can be challenging for many servers. With this template in the Waiter Wallet, waiters and waitress can impress their guests and enhance the dining experience by properly pairing wines with complete confidence.

Segment this template's courses (at the top) to fit with your restaurant and its menu. Then replace our text headers with whatever content works best.

PRO TIP I When you 'Print' any template, a 4-up PDF (three for the Waiter Wallet Sr.) is automatically created and downloaded to your computer.

NOTE I Use abbreviations to increase the number of dishes displayed in each template box.

LINK I [Wine Pairing Template](#)

Wine	Salad	Apps	Steak	Farm	Ocean
Sauvignon Blanc 					
Chardonnay 					
Riesling 					
Pinot Noir 					
Syrah 					
Merlot 					
Cabernet 					
Zinfandel 					

Oyster Template

If your restaurant sells oysters, this is an invaluable template. While not customizable, it lists forty-eight of the most popular oysters along with their region, size, and dominant flavor.

Now all servers can offer great oyster suggestions and satisfy guest's preferences with complete confidence.

PRO TIP | The Waiter Wallet Clear Pocket Insert adds two more, fast access template displays to any version of the Waiter Wallet.

Beer Pairing Template

Beer is the new wine (especially here in Colorado). Like wine, pairing beer with food can be both promising and problematic. This template resolves the problematic by delivering great curated suggestions.

We suggest segmenting this template with courses (at the top) to fit your restaurant and its menu optimally. Just replace the place holder text with the categories that work best.

PRO TIP | Not a beer or wine expert, a quick Google search can help fill in these templates and make you look like one.

NOTE | Use abbreviations to increase the number of dishes displayed in each template box.

LINK | [Beer Pairing Template](#)

Beer	Salad	Apps	Steak	Farm	Ocean
Stout 					
Ale 					
IPA 					
Belgium & French 					
Pilsner 					
Wheat Beer 					
Porter 					
Lager 					

Custom Template

Eight templates aren't enough, or do you want to create your templates? No problem.

With this template, you can use your floor charts, training manuals, or create any content you want.

Just create a JPG or TIF using the following pixel dimensions for your Waiter Wallet version.

Original/LTO: 366px x 471px

Deluxe: 322px x 471px

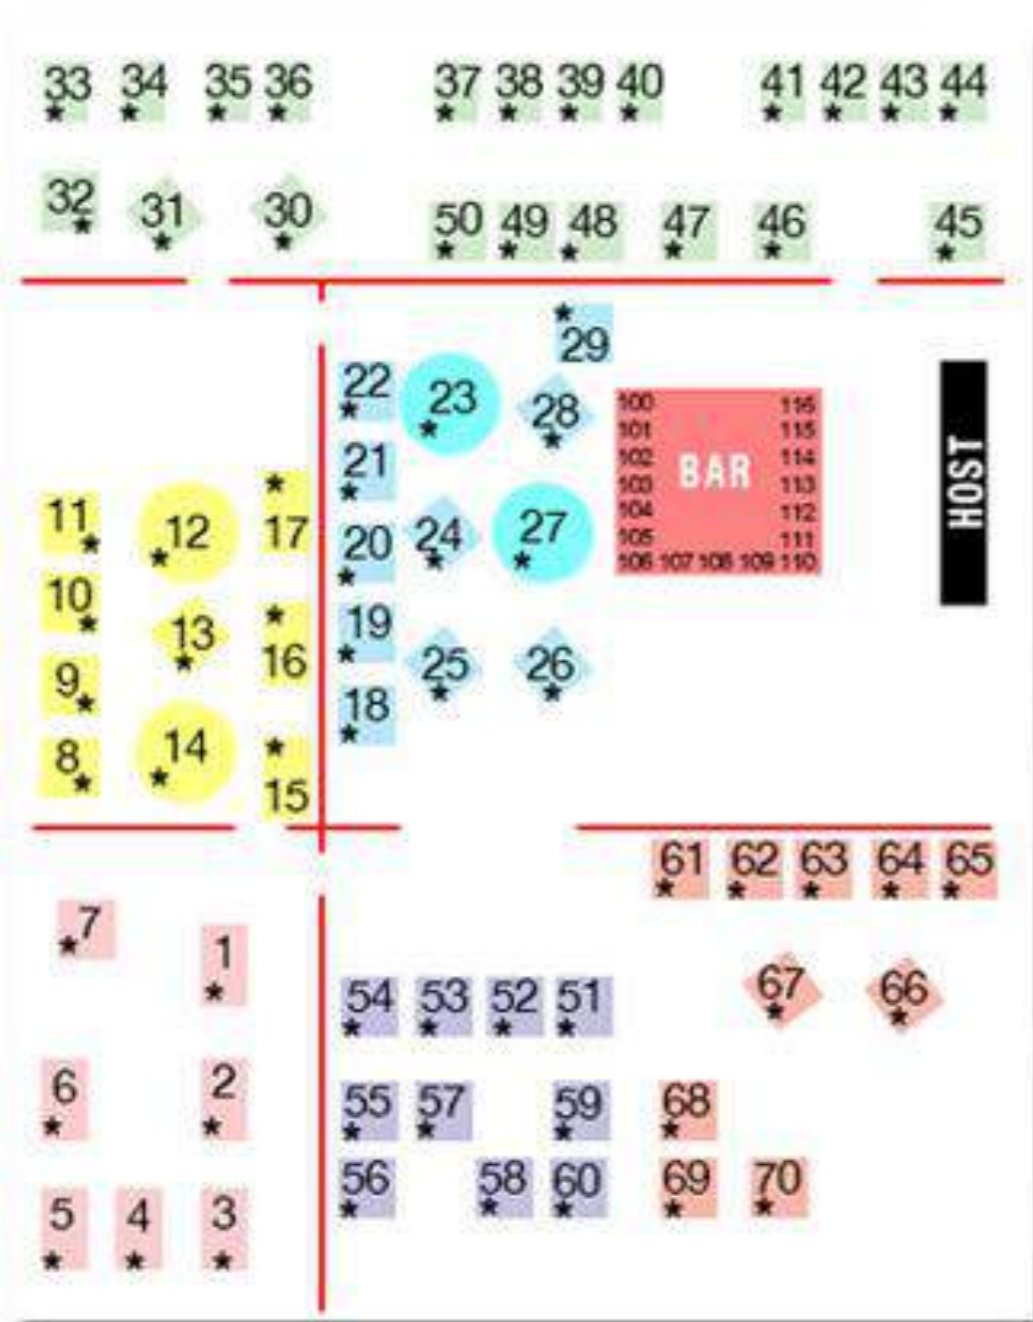

Sr.: 405px x 647px

Jr.: 285px x 388px

Jr. Deluxe: 240px x 388px

PRO TIP I Upload your floor chart. Include table numbers and an Asterix for 'position one.' At the start a shift, highlight your station and put it in the Waiter Wallet. Now tables won't be missed, and everything will be run out to guests correctly.

LINK I [Custom Template](#)

Bonus Tip | Waiter Wallet® LTO

We designed the Waiter Wallet LTO, with its guest-facing clear pocket, for casual dining restaurants. It's a walking, talking table tent that is effective at increasing a restaurant's PPA.

We recommend featuring an appetizer or dessert (or something a guest would not ordinarily order). After all, selling one entree over another is of a minimal benefit.

Best of all, any server can do it. When finished taking the order, the servers point to the image and says something like (but in their own words):

“Have you tried the Chocolate Cheesecake? It is a real favorite. Can I put one aside before we run out?”

It works! After all, the best time to sell the desert is when the guest is hungry, not after they just ate.

Another idea, server's insert a meaningful image, say of a place you would love to visit. When guests ask about the photos, you engage with them about it. It's a great way to connect with guests and increase tips.

Again, this is best suited for casual restaurants.
