## SIZE A - J <br> SIZING + GARMENT MEASUREMENTS

## NOTES ON FITTING

The Barkly skirt is designed to be fitted through the waist and then flares out into an A-line shape, giving extra room and comfort across the hips. Keep this is mind when selecting a size. Your hip measurement might be in a larger size bracket than your waist. Before grading between sizes, check the finished garment measurements to check if there will be enough ease in the hips - a good way to check this is take a tape measure and wrap it around your hips at the length given in the chart. Check you can move comfortably and sit down before determining whether you will grade up a size. This pattern is drafted for a height of $170 \mathrm{~cm}\left(5^{\prime} 77^{\prime \prime}\right)$. Use the LENGTHEN / SHORTEN lines on the pattern to make alterations to the length. More details related to fitting the Barkly skirt and making a toile can be found on p 6.
Styles can be mixed and matched so that you can combine your style preferences. More
 information can be found in the STYLE VARIATION KIT.

Please note: finished waist measurement for View A is taken from the centre of the waistband (as the skirt is designed so that the top of the waistband sits just above the natural waist). The back pieces of View B are slightly smaller than the back pieces of View A at the waist. This means that the finished waist measurements of the two designs are the same. Hip measurement between styles is also the same.
