TEND SECURE

LYNX SOLAR

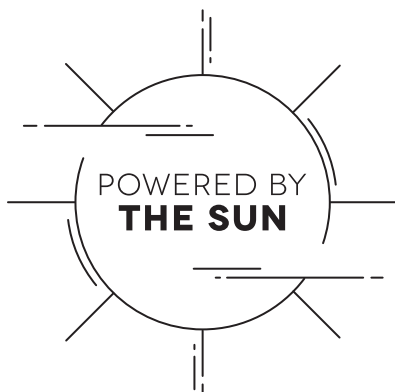

INTELLIGENT, EFFORTLESS VIDEO SECURITY, POWERED BY THE SUN

Turn your security inside out with Tend Secure Lynx Solar. As the first dedicated solar-powered camera in the market, Lynx Solar needs only 1 sunny day to power the camera for up to 7 days*. In the event of a power or internet outage, Lynx Solar continues monitoring and stores up to 3 days of data.

With Intelligent facial recognition, you can now identify exactly who is at your home. Upload pictures of friends and family to your facial recognition library and receive check-in notifications from familiar faces, and alert notifications if strangers show up.

With all this and much more, Lynx Solar ensures that rain or shine - your family is safe and your home is protected.

*based on 1 hour of recording/streaming per day.
