right: detail of walnut timber with a clear oil finish

## Y TABLE :

A clean, contemporary design, the Y Table demonstrates the skill required to manufacture the complex angles and joints of its base despite delivering a straightforward, utilitarian design. A simple rectangular top provides a quiet background that draws one's attention to the finely crafted solidwood legs.

As with most of our table designs, the Y Table is made to order and to size in increments of 100mm. However, please take a look at the standard sizes with layout drawings on pages 9 and 10 as this will give you a good indication of the length you will need, bearing in mind the overhang of the table top.

The Y Table is usually made with a 44mm thick top, but on smaller sizes and servers we can also make this design with a thinner 32mm top. With a 44mm thick top the Y Table can be made up to a maximum length of about 4.6m, while the 32mm thick version can only be made up to 3m long.

Kindly note that this design is suitable for indoor use only.

## STANDARD SIZES DINING :

32 / 44mm top		mm ( L W H )
6 seater (S)	-	1700 x 800 x 750
6 seater (S)	-	1700 x 900 x 750

## SEATING LAYOUT FOR STANDARD SIZES :

When choosing the size of your dining room table it is important to consider the style and size of the chairs you will be using, as well as the leg placement of the table design. The Y Table has an overhang which varies proportionally according to the length of the table. An overhang of 250mm ensures that the person seated at the head of the table has plenty of room for their feet, but 200mm on the medium size tables and 150mm on the small tables also works well.

When planning your seating arrangement, you should include space between chairs (at least 100-150mm) to ensure comfort when seated. Our Riempe Chair illustrates a minimum size seating arrangement and the Hardwood Chair is a good measure of a medium size chair with armrests. If the chair you select is wider than 550mm you should increase the table length accordingly to ensure there is enough space. You can increase your seating arrangement for special occasions by placing chairs closer together and/or by placing two chairs at the table heads. This works best from 1m wide upwards.

The below scale drawings include 150mm space between chairs, for the most part.

### 6 Seater (S)

1700 x 900 x 750mm high | chairs 450mm wide  
Overhang: 150mm

6

### 6 Seater (M)

1800 x 900 x 750mm high | chairs 540mm wide  
Overhang: 150mm

### 8 Seater (S)

2300 x 1000 x 750mm high | chairs 450mm wide  
Overhang: 200mm

8

### 8 Seater (M)

2500 x 1000 x 750mm high | chairs 540mm wide  
Overhang: 200mm

### 10 Seater (S)

3000 x 1000 x 750mm high | chairs 450mm wide  
Overhang: 250mm

10

### 10 Seater (M)

3300 x 1000 x 750mm high | chairs 540mm wide  
Overhang: 250mm

## SEATING LAYOUT FOR STANDARD SIZES (CONT.) :

On longer dining tables you can easily increase the table width from 1000mm to 1100mm or 1200mm without affecting the overall look of the table design. The widest standard width that we recommend is 1200mm as this gives you enough space, but also keeps conversation intimate. However, we can make most of our designs any width in increments of 100mm.

On tables under 2500mm long, we prefer a width of either 900mm or 1000mm, as this helps to visually elongate the shorter lengths and keeps the design in proportion. If you are looking to save space, then an 800mm wide dining table also works as a narrow bistro-style table.

### 12 Seater (S)

3600 x 1000 x 750mm high | chairs 450mm wide  
Overhang: 250mm

12

### 12 Seater (M)

4000 x 1000 x 750mm high | chairs 540mm wide  
Overhang: 250mm

### 14 Seater (S)

4200 x 1000 x 750mm high | chairs 450mm wide  
Overhang: 250mm

14

### 14 Seater (M)

4600 x 1000 x 750mm high | chairs 540mm wide  
Overhang: 250mm

## TABLE TOP OPTIONS - 32mm / 44mm :

### 8 Seater (m) - 32mm thick top

2500 x 1000 x 740mm high | chairs 540mm wide  
Overhang: 200mm

### 8 Seater (m) - 44mm thick top

2500 x 1000 x 750mm high | chairs 540mm wide  
Overhang: 200mm

## CARE INSTRUCTIONS - SOLID WOOD INDOOR FURNITURE :

---

you will need:

soft cloths / rags | water | soap

optional recommended soap: ProNature Plant Soap

---

## DAILY CARE :

---

All the finishes we offer provide good protection to the timber. However, no finish can offer bullet-proof resistance to staining or scratches and your furniture will not be impervious to damage. But if you follow the instructions laid out below, it should be sufficient for normal, everyday use.

After use, wipe down the wood surfaces with a slightly damp soft cloth to preserve and protect the wood coating. Dry with another cloth if a lot of water remains. Do not expose these products for any extent of time to pools of water. If the products get wet you should dry them off as soon as possible. Most specifically oil, vinegar and fatty foods should be wiped up immediately using a mild solution of soapy water on a well-rung out damp cloth. Spills should not be left overnight as they will sink in and mark.

Never use Ammonia (ie Handy Andy) or oil/silicone based cleaners (ie Mr Min) on solid wood furniture as they will damage the finishes and can create cloudy marks.

Placing hot items on the wood may result in damage or burning. We recommend that you use coasters and trivets to protect the table tops from hot dishes.

We do not recommend that you place indoor furniture outdoors for any period of time. Outdoor furniture, even for covered outdoor areas, is specially designed to be able to withstand the dramatic temperature changes and moisture in the air. Exposing indoor furniture to outdoor environments could lead to warping, cracks, discolouration and ultimately will weaken the structural integrity of the design over time. Please enquire about our outdoor range if you are in need of outdoor or semi-outdoor furniture.

When used indoors, avoid placing solid wood furniture in full, everyday sun as exposure to sun/UV can cause yellowing, bleaching and light surface cracks.

Heavily airconditioned environments require the use of an humidifier to restore the natural humidity of the air, as extremely dry air will result in cracking / warping of the timber. This is also the case with central heating in cold climate countries.

## MAINTENANCE :

---

When properly taken care of, your indoor piece of furniture should not need much maintenance beyond the above. All of our indoor tables receive a final coat of clear varnish to increase protection from liquids and foods. As such, you cannot re-oil your indoor furniture without first fully sanding off this layer of varnish.

Should you need to sand and re-oil your piece of furniture please contact us first so that we can recommend the course of action particular to your chosen design, timber and finish.

We work with a local oil manufacturer who produces top quality environmentally friendly and non-toxic oil finishes which we can recommend to you based on your order.

James Mudge
