works drinks cabinet with antique brass doors

D E T A I L S :

H A R R I N G T O N C H A I R :

When making a solid-wood chair, we employ the guiding principles of weight, strength and form. Using the highest levels of fine craftsmanship, with specific attention to detail on traditional jointing techniques, we have been able to transform minimal materials into a slender bistro-style chair. While being as lightweight as possible, Harrington dining chair is still strong enough to withstand the demands of a busy environment.

Harrington takes its name from Cape Town's Harrington Street, reputable for its wine-bars, restaurants and cafés. In these close quarters, elegant design is mixed with a fast-paced approach to relaxation and sociability. The scooped back and upholstered seat of Harrington will encourage comfort and repose as the night grows longer and the bars get fuller.

As with most of our designs, Harrington is available in a large variety of timbers and finishes as well as custom painted colours.

This design is suitable for indoor use only.

D I M E N S I O N S A N D F I N I S H E S :

600 x 600mm per seat, do not cut to size.

CARE INSTRUCTIONS - SOLID WOOD INDOOR FURNITURE :

- you will need:
- soft cloths / rags
- water

DAILY CARE :

In order to retain the natural finish of the timber we keep the number of protective coats to a minimum. Although this does add to the aesthetic appeal of the product, highlighting the natural qualities of solid wood, it does mean that the finish is not impervious to damage and staining. However, if you follow the instructions laid out below, it should be sufficient for normal use.

Do not expose these products for any extent of time to pools of water. If the products get wet you should dry them off as soon as possible. Light scuffs can gently be wiped off with a damp cloth and some soapy water.

With the painted and dark charcoal finish, the finish is susceptible to wear. Although the chairs are professionally air gun painted with a durable finish, they will not be impervious to damage and care should be taken when placing and moving chairs around a table etc.

We do not recommend that you place indoor furniture outdoors. Outdoor furniture is specially designed to be able to withstand the dramatic temperature changes and moisture in the air. Avoid placing timber furniture items in full sun as exposure to sun/uV causes yellowing and light surface cracks.

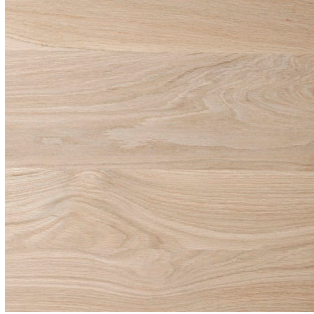

Heavily airconditioned environments require the use of an humidifier to restore the natural humidity of the air, as dry air will result in cracking / warping of the timber.
