SKINNY HARVEST COFFEE TABLE :

The Skinny Harvest Coffee Table is a slimmer, more refined version of the Harvest Coffee Table design. As such, it works nicely for smaller homes, apartments or office meeting rooms where space is at a premium and the aesthetic is streamline.

When made as a rectangular piece, the table legs include a single, linear stretcher. However, when made as a round or square coffee table the legs include a crossover stretcher, as seen in the previous images. We can also offer a slatted stretcher, forming a bottom shelf, at an additional cost. As with most of our designs, we make this table in a wide variety of sizes, in increments of 100mm. Kindly email us if you are looking for a different size.

Kindly note that this design is only suitable for indoor use. We do make an outdoor version of the slightly thicker Harvest Table design – please contact us for further information.

STANDARD SIZES :

<b>32mm thick top   rectangular with a linear stretcher</b>
1200 x 800 x 450mm high
1400 x 800 x 450mm high
1600 x 800 x 450mm high
1600 x 900 x 450mm high
1800 x 800 x 450mm high
1800 x 900 x 450mm high
<b>32mm thick top   round or square with a crossover stretcher</b>
800 Ø x 450mm high
900 Ø x 450mm high
1000 Ø x 450mm high
1100 Ø x 450mm high
1200 Ø x 450mm high

CARE INSTRUCTIONS - SOLID WOOD INDOOR FURNITURE :

---

you will need:

soft cloths / rags | water | soap

optional recommended soap: ProNature Plant Soap

---

DAILY CARE :

---

All the finishes we offer provide good protection to the timber. However, no finish can offer bullet-proof resistance to staining or scratches and your furniture will not be impervious to damage. But if you follow the instructions laid out below, it should be sufficient for normal, everyday use.

After use, wipe down the wood surfaces with a slightly damp soft cloth to preserve and protect the wood coating. Dry with another cloth if a lot of water remains. Do not expose these products for any extent of time to pools of water. If the products get wet you should dry them off as soon as possible. Most specifically oil, vinegar and fatty foods should be wiped up immediately using a mild solution of soapy water on a well-rung out damp cloth. Spills should not be left overnight as they will sink in and mark.

Never use Ammonia (ie Handy Andy) or oil/silicone based cleaners (ie Mr Min) on solid wood furniture as they will damage the finishes and can create cloudy marks.

Placing hot items on the wood may result in damage or burning. We recommend that you use coasters and trivets to protect the table tops from hot dishes.

We do not recommend that you place indoor furniture outdoors for any period of time. Outdoor furniture, even for covered outdoor areas, is specially designed to be able to withstand the dramatic temperature changes and moisture in the air. Exposing indoor furniture to outdoor environments could lead to warping, cracks, discolouration and ultimately will weaken the structural integrity of the design over time. Please enquire about our outdoor range if you are in need of outdoor or semi-outdoor furniture.

When used indoors, avoid placing solid wood furniture in full, everyday sun as exposure to sun/UV can cause yellowing, bleaching and light surface cracks.

Heavily airconditioned environments require the use of an humidifier to restore the natural humidity of the air, as extremely dry air will result in cracking / warping of the timber. This is also the case with central heating in cold climate countries.

MAINTENANCE :

---

When properly taken care of, your indoor piece of furniture should not need much maintenance beyond the above. All of our indoor tables receive a final coat of clear varnish to increase protection from liquids and foods. As such, you cannot re-oil your indoor furniture without first fully sanding off this layer of varnish.

Should you need to sand and re-oil your piece of furniture please contact us first so that we can recommend the course of action particular to your chosen design, timber and finish.

We work with a local oil manufacturer who produces top quality environmentally friendly and non-toxic oil finishes which we can recommend to you based on your order.

James Mudge
