

OSTEOACTIVES®

NATURAL

JOINT & BONE CARE

Opti MSM®
Oxygen 7® Enzyme Complex
Bamboo Gum Extract

FREQUENTLY ASKED QUESTIONS

DIRECTIONS:

As a dietary supplement, take 1-2 capsules twice daily with meals. For Intensive Use: take 3 capsules twice daily with meals or as directed by your physician. Best results are obtained with long-term, consistent use.

IS IT SAFE?

Absolutely it's safe. It is a nutrition supplement – NOT A DRUG! During the last 20 years, thousands of health professionals and pharmacies have sold thousands of bottles of our bone & joint formulas around the world. Every ingredient is on the United States FDA's GRAS list for safety. In fact, OsteoActives could not be sold here in the United States if it was not safe.

WHAT IS IN IT?

OsteoActives combines organic Silica with OptiMSM® and many other wonderful plant-derived nutrients which may support healthy **Joints, Bones, Ligaments, Tendons, Hair, Skin, Nails and Connective Tissue**. These botanicals include Turmeric, Boswellia, Red Algae, Ionic Minerals, Aloe Vera and much more.

WHY IS OptiMSM® THE BEST FORM OF MSM?

MSM (Methylsulfonylmethane) is a naturally occurring nutrient found in the normal diets of humans and almost all other animals. MSM is made up of 34% sulfur, the fourth most abundant mineral in the human body. This versatile nutrient supports healthy, active lifestyles and benefits multiple structures and functions within the body, including connective tissues and the respiratory system. All commercially available MSM must be manufactured because the amounts found in nature are too small to be extracted. OptiMSM is precisely manufactured to more stringent product specifications than any other MSM available. It is rigorously tested, supported by peer-reviewed published research, and licensed under exclusive worldwide MSM use patents. OptiMSM is the pure (Excipient Free) and patented form of MSM. It is non-allergenic, non-toxic and one of the safest compounds that we can consume, comparable to water. OptiMSM is pharmaceutical grade quality MSM, and is produced by the method of distillation.

WHAT MAKES THE OXYGEN 7® PLANT ENZYME COMPLEX GREAT?

A synergistic combination of 7 plant-derived enzymes. Lactase, Lipase, Bromelain, Papain, Alpha Amylase and Acid Stable Protease. These enzymes play a critical role in absorption and assimilation of the OsteoActives nutrients. Oxygen Nutrition is one of only a few companies using a proprietary enzyme-delivery-system in our products. We like to call it our "secret sauce".

CAN I TAKE OsteoActives IF I AM TAKING DRUGS OR MEDICINES?

If you are taking any drugs, if you are pregnant, if you are lactating, if you have allergies or if you are contemplating a new diet or exercise program, you should always check with your health care physician. OsteoActives is a nutritional supplement and should not replace any medicines without you first consulting with your health care physician.

CAN I STILL TAKE MY VITAMINS THAT I TAKE EVERY DAY?

Absolutely you can. OsteoActives is a nutritional supplement. You should always check with your health care physician if you are contemplating a new diet or exercise program.

I AM GOING IN FOR SURGERY CAN I STILL TAKE OsteoActives?

That is a good question! You should always check with your health care physician.

I AM ON CHEMO THERAPY CAN I STILL TAKE OsteoActives?

That is a good question! You should always check with your health care physician.

CAN I TAKE OsteoActives AT ANY TIME?

It is advisable to take it anytime. Just be sure and take it with a food or a meal.

WHERE IS OsteoActives MADE?

OsteoActives is made in the USA, under stringent conditions, where absolute safety protocols and standards are met. The lab is a GMP qualified lab. GMP represents the optimum standard for manufacturing.

WHY DO YOU FEEL YOUR PRODUCT OsteoActives IS BETTER THAN CALCIUM SUPPLEMENTS?

Dr. Louis Kervran, having studied calcium assimilation for many years in animals, concluded that animals do not eat calcium, yet they produce calcium in their bodies. He discovered that animals eat foods rich in minerals that actually biologically transmutate into other minerals required by the animals for metabolic processes. Since bone grows and replaces itself every 6-8 years, Dr. Kervran showed how organic plant-derived Silica transmutates in the body to aid in bone production and strengthening. Dr. Kervran changed the way health professionals looked at mineral assimilation, especially calcium. Today, there are literally thousands of health professionals and researchers that can attest to how poorly calcium is absorbed by the body. Diseases such as osteoporosis, PMS, hypertension, depression and many others are often the result of a calcium deficiency. Ingesting calcium supplements is not the answer. Arguably, they do not work and never have. Humans cannot assimilate a waste product such as synthesized calcium because the body does not know how to metabolize it. This type of calcium collects in the organs, tissues, and joints causing progressive osteoporosis and over a hundred other complications.

The Food & Drug Administration has evaluated none of the above statements. This product is not intended to diagnose, treat, cure, or prevent any disease.

Cautions: Keep out of reach of children. If you are pregnant, nursing, diabetic, on medication, have any medical condition, or are beginning a weight control program, consult your physician before using this product or any other dietary supplement. Discontinue use if allergic reaction occurs. Store in a cool, dry place.
