

# Wingz Table™

Installation Instructions

ZOVUNA

# Parts

Slot cover (if option selected)

Hex Wrench

Non-slip pad (if option selected)

Wingz Table assembly

# Installation Steps

1

Check arm width of your chair or sofa to determine the configuration needed.

If width is between 1 & 2.5 inches go to step 2a.

If width is between 3 & 7 inches go to step 2b.

Note: If equipped with the slot cover it should be removed by pressing out from the bottom of the table through the slot opening. The slot cover is retained by a magnet.

3

Slide table down on chair arm and move adjustable arm so that it's snug to chair arm. Then tighten screws.

2a

If the chair arm width is between 1 & 2.5 inches you will need to reconfigure the adjustable arm. This is done by removing the screws and reversing the adjustable arm as shown.

4a

If using the slot cover install by inserting cover into one end, aligning with opening before slowly lowering into slot. Magnet will keep cover in place.

2b

If the chair arm width is between 3 & 7 inches the standard configuration can be used. Loosen screws so that adjustable arm moves easily.

4b

If using the non-slip pad simply place on table while aligning the protruding bar on the pad to the slot on the table. This will align it perfectly with the table.

## Hints and Tricks:

1. Non-slip indoor rug pad can be used between the table and the chair arm to keep the table in place if needed.
2. Wingz table can be mounted backwards, extending inward, to support a tablet or laptop for easy access.
3. Lint may show on the dark colored non-slip pads. This can be easily cleaned by removal of the pad and placing under running water while lightly scrubbing. Dry between folded lint free towels.
4. The non-slip pad is fabricated of a soft silicon rubber which may show some wear marks with use on close inspection. This is normal and does not detract from the functionality of the product. Replacement pads are available.

## Need more help?

We hope that you enjoy your new Wingz Table. If you have questions please check the support page at [zovuna.com](http://zovuna.com) for any updates. Also do not hesitate to contact us at [info@zovuna.com](mailto:info@zovuna.com) if you need more help.
