

## BDC-1133PHC DUST COLLECTOR

HEPA VERSION OF THE BDC-1133PM

The BDC-1133PHC is a small light weight industrial vac made of strong polyester making it light to carry, damage resistant, and easy to clean.

The Blastrac BDC-1133PHC is a compact dust collection system ideal for hand tools and small grinding machines. It can be used for both wet and dry applications. The BDC-1133PHC is specially designed to deal with hazardous materials due to its H-class filter.

The H-class machine includes a hose diameter setting, a flow sensor warning (LED + buzzer) and a filter system for monitoring, missing, damaged or clogged H-class/HEPA filter.

### USER FRIENDLY

The BDC-1133PHC dust extractor is robust and easy to handle when it comes to transportation from one site to another. All models offer flexible storage solutions for tools and accessories, so everything you need is at hand.

### SAFE WORKING ENVIRONMENT

This dust collector has improved cleaning performance. It is equipped with the InfiniPulseClean system (automatic filter cleaning system). The optional "asbestos kit" will offer you even more safety (motor cooling air filter, exhaust air collector).

### FOR HEAVY DUTY WORK

Our range of small dust collectors comes with more suction power, a sealed dust system, automatic filter cleaning, and several other user benefits. They are designed to meet the tough requirements in building, construction and other industries.

### OSHA COMPLIANCE

Our dust collectors are made to comply with OSHA's Respirable Crystalline Silica Standard for construction, containing a filter-cleaning mechanism and a high-efficiency particulate air (HEPA) filter of at least 99.97 percent efficiency in removing mono-dispersed particles of 0.3 micrometers in diameter.

	33 LITERS
	HANDHELD   SMALL GRINDERS   SMALL SCARIFIERS

### MULTIPLE FILTRATION OPTIONS

The dual filter solution secures high filtration levels and minimizes dust exposure to the HEPA filter. The main filter captures most of the dust and the 2nd step, the remaining small and hazardous dust particles are captured by the HEPA filter.

### CONTINUOUSLY WORKING

The BDC-1133H introduces a new improved automatic filter cleaning system, which secures continuously high suction performance and sealed airflow. A powerful reverse air pulse is activated every 15 seconds, keeping the air flow at a high level.

### DELIVERED WITH STANDARD ACCESSORIES

Heavy duty hose Ø36x4000mm with quick system fitting. Stainless steel curved hand tube, crevice nozzle, antistatic tool adapter, 2 hose/cable hooks, 1 fleece filterbag and 1 plastic disposal bag.

### BAGGING SYSTEM

Our Longopac system allows you to collect the dust in easy to handle packages of 25 kg without dispersing dust. The tube-like bagging system is dust free since the bags are replaced and sealed from the outside – there is no contact with the waste.
