

WHAT IS ENERGY WELLNESS WATER™

A world-renowned Physicist wondered why all of his clients suffered from intracellular dehydration. Dehydration is either a major component and/or results from many ailments.

He started researching water from all over the world. He had samples sent to him from places that people flocked to because they felt they'd get well. The only difference he could find in all the samples of water were local situations. For instance, there might be a mineral that was present in the particular area where the water came from.

After years of research he finally realized that the reason for intracellular dehydration is because 97% of the individual H₂O molecules on Earth are too large to permeate the cell membrane. He created proprietary technology and used the natural laws of the large-sized H₂O molecule against itself to cause the molecule to reassemble itself to .04 nanometers which now enabled the small-sized H₂O molecule to permeate the cell membrane. Energy Wellness Water was born!

Why does this matter?

Because years of taking advice to drink water so we can be hydrated, really has resulted in irrigation. Irrigation is vital. However, true hydration cannot occur unless pure, clean, fresh water enters the cell membrane daily and begins expelling pollutants. Energy Wellness Water **IS** The Hydration Solution™... it is the beginning of the end of dehydration.
