

Paint & Private Labeling

Though we do have standard product offerings, many of the components that we sell are designed and built to our customers' specifications. As a result of this custom fab capability, we have developed extensive finishing options. Our customers may choose from one of our standard paint colors or have us customize a color that's just right for them. Omni also offers private labeling services. Let us provide components to your exact specifications and ship direct to your customer. Provide us with your labels and shipping documentation to make the process seamless. Be sure to inform your customer service representative of your finishing and shipping needs.

PRIVATE LABELING

- Equipment painted with your specified color
- Your tags or labels affixed to the custom equipment
- Your part numbers on documentation
- Your shipping paperwork
- Equipment blind shipped directly to your customer

Your good name, our quality equipment
