(A) Horizontal Frame Bars

1. Take Hybrid out of bag. Roll out fully.
2. Place horizontal frame bars through the sleeve and secure.

(B) Poles

1. Insert 2 poles into the pole sleeves.

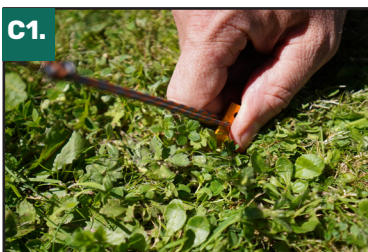

NOTE: Longer pole at head end, shorter pole at foot end.

2. Place poles in eyelets (Fig.3 A) and clip poles at side (Fig.3 B).

(C) Tent Use

1. Place tent on ground/area to pitch. Use stakes to tie back both guy-lines at head end.
2. Straighten out Hybrid and repeat at foot end.

(D) Without Flysheet

1. If using without flysheet, the tent is pitched.
2. Ensure that extra fabric from the floor is tucked underneath so water doesn't pool.

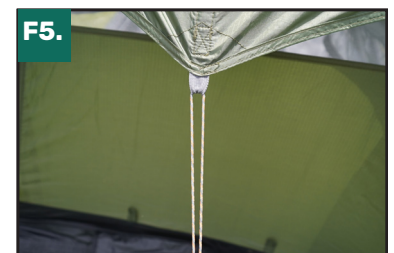

(E) With Flysheet

1. To add the flysheet, simply find the Velcro on the underside of the flysheet and match with the Velcro on the pole sleeves as shown.
2. Buckle in the sides (head and foot of tent).
3. Use the orange elastic bands attached to flysheet and guy ropes to stake down (as seen below)
4. Velcro down the sides and top.
5. Open the vent.

(F) Hammock Use

1. Find suitably spaced trees. Tie tree huggers around each tree as shown. They can be adjusted using the loops as shown.
2. Straighten out ropes and attach the carabiner to loop as shown. Repeat at other side.

Note: please ensure that it is tied tightly.

3. If using the flysheet, match the Velcro patches on the 4 corners of the pole sleeve to the underside of the flysheet.
4. Secure guy-lines from elastic ties on hammock ropes.
5. Tie around ropes at either end using the orange ties provided.
