There are many variables when setting up your HoverChair, so many of these steps are guidelines and may require some adjustment to get a comfortable position.

1

a) *Your HoverChair can be hung from a tree, beam or any suitable and strong overhead structure. The HoverChair comes with an adjustable hanging strap, but you would look for your branch, beam, etc. to be at least 7 feet (2 meters) or higher.*
b) Pull the HoverChair, inflatable seat, and spreader poles out of the bag. Fig 1A
c) Put the 2 shorter spreader poles under the seat. Fig 1B
d) Inflate the seat and place it is the zippered seat pocket. Fig 1C

Fig 1A Fig 1B Fig 1C

2

a) Wrap the adjustable strap around the tree branch, beam, etc. and line the single loop up with a corresponding adjustment loop at the desired height. Fig 2A
b) Put the carabiner through both the single loop and the adjustment loop. Fig 2B
c) Place the spreaderbar into the gromets on the top of the mesh back of the HoverChair Fig 2C

Fig 2A Fig 2B Fig 2C

That's it! Quick and easy set-up. Just a few adjustments and you are ready to enjoy your Hoverchair

3

There are three adjustment straps for the chair:
a) The two straps on the sides control the height and pitch of the seat.
b) The adjustment strap in the middle controls the height of the back. This adjustment allows you to have a more relaxed lay VS. a straighter sitting position. Fig 3B

Fig 3A

Once the chair is set up to your comfort levels, you can fold up the straps and use the included Velcro strip to keep the straps all tighty and away from your face while you enjoy hovering in your chair.

4

If you purchased the optional foot hammock, there are two ways this can be attached:

a) You can use the provided buckles and clip the foot hammock directly to the corresponding buckles on the seat of the chair. From there, you can adjust the height of the foot hammock to your comfort level. FIG 4A
b) You can use the provided foot hammock strap. The strap can go over the same or close by branch, beam, etc. Clip the foot hammock directly to the strap and adjust the height of the foot hammock according to your comfort level.
