## HOW TO DETERMINE YOUR FINGER SIZE

## Step 1: Check printed paper size and accuracy.

1. Carefully follow these instructions to gain an accurate and precise measurement.
2. Before printing this form, ensure 'Page Scaling' is set to 'None'.
3. After printing measure the scales on the right with an accurate ruler or place a dollar coin where indicated. The coin should fit exactly and completely over the entire image.

## Step 2: Measure a current ring to determine your size.

1. Use a ring that comfortably fits the desired finger. Some rings overtime may no longer be perfectly circular, so it's best to use a ring that is still in shape to gain acurate results.
2. Place the ring over the measuring circles below. Match the inside edge of your ring to the line of the circle. Once you have found a cirlce that lines up perfectly that is your size. If your ring sits between two sizes we recommend to order the larger size or a $1 / 4$ size.
3. Consult your Made In Earth team for their expertise anytime.

MEASUREMENTS MATCH THE INSIDE EDGE OF THE RING

## INTERNATIONAL SIZING CHART

| Circumference (mm) | Diameter (mm) | UK, Europe, \& Australia | United States | Made In Earth |
