

"We Don't Make Knife. We Make Knife Better", is always what Kansept do.

"Kansept" is the deformation of the meanings and pronunciation of "Concept". The structures of knives and ways of making knives are much of muchness, what makes us stand out from the crowd is the ability of innovation. Just like the design idea of our logo, it derives from the image of UFOs which always shuttle from space to space and leaps into future. This means Kansept will always keep pace with the times and constantly absorbs fresh innovative elements and finally put them into knives in future.

Located in Yangjiang, the city of knife in China, Kansept has always claimed a pioneering spirit, an openness to the world, talent, cutting-edge technologies and design. Make the best use of the natural advantages, Kansept offers the best quality-guaranteed knives at a very affordable price.

We have a selected skillful production team with more than 20 years of experience in the knife industry. While at the same time, we also set up a strong Research & Development department to continuously design the most ergonomic, innovative and high quality in-house knives. We not only designs our own pieces of knives, but also strive to bring in the most trendy and innovative designs from foreign respected and potential knife makers.

## K1001 Kryo series

The Kryo has three versions in different finishes and materials. Its blade provides a reliable edge that delivers solid cutting performance in outdoor and urban environments alike. It also comes with a reversible one-piece 3D milled titanium pocket clip for easy carry. The Ball Bearing system provides smooth opening and a frame/liner lock firmly secures the blade in the open position.

4

Kansept Carries the responsibility to extract the very best from the materials made available to the customer and to bring them together in a knife which is both aesthetic and practical. With professional and advanced equipments, Kansept is capable of manufacturing knives with high quality. Each component is machined, finished and meticulously fitted by hand and advanced machines in an exquisite craftsmanship and aesthetics.
