PRODUCT GUIDE

"We Don't Just Make Knives, We Make Knives Better"

"Kansept" is the re-formation of the meaning of "Concept". The structure of knives and ways of making knives, are much of a muchness. What makes us stand out from the crowd is our ability to innovate. Just like the design of our logo, which derives from the image of UFOs that travel from space to space and leap into the future. This means Kansept will always keep pace with the times and constantly absorb fresh and innovative elements and finally put them into knife designs.

Located in Yangjiang, the city of the knife in China, Kansept has always claimed a pioneering spirit; an openness to the world; talent; cutting-edge technologies and design. Making the best use of our natural advantages, Kansept offers the best quality guaranteed knives, at a very affordable price.

We have a selected a skilled production team with more than 20 years of experience in the knife industry. While at the same time, we also set up a strong Research & Development department to continuously design the most ergonomic, innovative and high quality in-house knives. We not only design our own knives, but also strive to bring in the most innovative designs from respected foreign and new knife makers.

Kansept carries the responsibility to extract the very best from the materials currently available and to bring them together in a knife which is both aesthetic and practical. With the most advanced equipment available, Kansept is capable of manufacturing knives to the highest quality. Each component is machined, finished and meticulously fitted, both by hand and advanced machining in an exquisite blend of craftsmanship and aesthetics.

OEM and ODM are always welcome. Working with us will greatly help cut down your cost and win new markets.

If you have any questions, please feel free to email us at info@kansept-knives.com

Entity-1036

The Entity flipper from Nalu Boersma features a premium CPM-S35Vn or Damascus blade. The titanium handle sports a strong frame lock and a low profile pocket clip.

Nalu Knives

Designer

Nalu Boersma has been rapidly building a fanbase in a few short years as a maker to watch for good reason. Building them one at a time manually, produces a knife that has an old-world feel with new-world materials. His unique aesthetic blends with our design concept perfectly and his attention to detail makes the knife a joy to deploy and use.

ENTITY-1036

Blade Length	3.51"/89mm	Weight	4.55oz/129g
Overall Length	8.1"/206mm	Blade Steel	Satin CPM-S35VN
Blade Thickness	0.14"3.56mm	Handle Material	Titanium

K1036A2 NEW

Blade Length	3.51"/89mm	Weight	4.55oz/129g
Overall Length	8.1"/206mm	Blade Steel	Black TiCN Coated CPM-S35VN
Blade Thickness	0.14"3.56mm	Handle Material	Silicon Carbide Coated Titanium

K1036A3 NEW

Blade Length	3.51"/89mm	Weight	4.55oz/129g
Overall Length	8.1"/206mm	Blade Steel	Damascus
Blade Thickness	0.14"3.56mm	Handle Material	Silicon Carbide Coated Titanium

Fenrir

Fenrir is a functional EDC knife with bold aesthetic lines. The large belly and sharp point make it versatile for every day use. Multiple deployment options and versatile ergonomics make it a great knife to handle.

Greg Schob

Designer

Greg Schob / Sparrow Knife Co.

Greg Schob is custom knife maker and is currently serving in the US Coast Guard on the Gulf Coast of Mississippi. A metal fabricator by trade, he began making knives, leather, and anything EDC related. His goal is to become a full time maker when he retires from the Coast Guard in 2023 bringing unique and functional designs to the community.

FENRIR

K1034A1 **NEW**

Blade Length	3.43"/87mm	Overall Length	7.89"/200.05mm	Blade Thickness	0.14"/3.56mm
Weight	4.44oz/126g	Blade Steel	Black TiCn Coated CPM-S35VN	Handle Material	Titanium+Shred Carbon Fiber

Naska 1035

Aurelien has always been passionate about knives since he was very young. At the age of 19 during his first year of medicine, he embarked on the crazy idea of making his own knife. Today he got into the game and continues to make different styles of folding knives for my greatest pleasure. Entering the world of cutlery allowed me to meet great people around the world, which greatly encouraged me to continue to develop and improve his knives at all times

APK Designs

Designer

Aurelien has always been passionate about knives since he was very young. At the age of 19 during his first year of medicine, he embarked on the crazy idea of making his own knife. Today he got into the game and continues to make different styles of folding knives for my greatest pleasure. Entering the world of cutlery allowed me to meet great people around the world, which greatly encouraged me to continue to develop and improve his knives at all times.

NASKA 1035

K1035A1 **NEW**

Blade Length	4.53"/115mm	Overall Length	10.3mm/260.5mm	Blade Thickness	0.157" / 4.0mm
Weight	6.35oz/180g	Blade Steel	Black TiCn Coated CPM-S35VN	Handle Material	Titanium

K1035T1 **NEW**

Blade Length	4.53"/115mm	Overall Length	10.3mm/260.5mm	Blade Thickness	0.157" / 4.0mm
Weight	6.35oz/180g	Blade Steel	CPM-S35VN	Handle Material	Titanium

Egress 1033

The Egress is a sleek pocketable front flipper with a 3D contoured titanium milled pocket clip. It has a super thin flat grind on an aggressive Wharncliffe profile with thumb hole deployment. The Egress has a hidden lanyard pin that doesn't affect the ergos as well as a crowned spine and jimping in selected areas for quick indexing and a new front flipper deployment option.

Nitch Designs

Designer

Nick Rogers, a knife enthusiast learning everything he can about knives. The joy of collecting lead to teaching himself 3D CAD software so that he could design knives with all the features he wanted and to find out what really goes into making a great knife. The goal of Nitch Designs is to create unique, purpose driven knives and products that enthusiasts like him would like to own and carry. He aims to provide other enthusiasts with attractive, performant knives at an affordable price.

EGRESS 1033

Overall Length	8.23"/209mm	Blade Steel	Black TiCn Coated CPM-S35VN
Blade Thickness	0.157" / 4.0mm	Handle Material	Jade G10

Reedus 1041

In general, Reedus is a tribute to classical traditions, but with modern details and appearance. Of course, first he has designed Reedus for himself. It's powerful and ergonomic EDC knife.

D.O.C.K. 

Designer

D.O.C.K. (Dmitry Osarenko Custom Knives)
Russia, Saint-Petersburg.

Making knives is not a job, it is a calling. Dmitry always look at knives with a special look. Knives mean much more for him than just a tool. He had studied for a long time to work on manual turning and milling machines. Later, he began to use CNC technology. He is constantly learning, improving his knowledge and skills. His knives are distinguished by their unique design and special charisma. In his opinion, a knife should always have its own character, design, sound and tactile sensations. And of course, the knife should bring you emotion, joy, inspiration and a sense of life.

REEDUS 1041

K1041A1 NEW

Blade Length	3.5"/88.9mm	Weight	3.8oz/108g
Overall Length	7.9"/201.8mm	Blade Steel	Satin CPM-S35VN
Blade Thickness	0.14" / 3.5mm	Handle Material	Titanium

K1041A2 NEW

Blade Length	3.5"/88.9mm	Weight	3.8oz/108g
Overall Length	7.9"/201.8mm	Blade Steel	Black TiCn Coated M390
Blade Thickness	0.14" / 3.5mm	Handle Material	Black Anodized Titanium

T1041A1 NEW

Blade Length	3.5"/88.9mm	Weight	3.8oz/108g
Overall Length	7.9"/201.8mm	Blade Steel	Satin CPM-S35VN
Blade Thickness	0.14" / 3.5mm	Handle Material	Black Anodized Titanium

T1041A2 NEW

Blade Length	3.5"/88.9mm	Weight	3.8oz/108g
Overall Length	7.9"/201.8mm	Blade Steel	Black TiCn Coated CPM-S35VN
Blade Thickness	0.14" / 3.5mm	Handle Material	Green G10

T1041A3 NEW

Blade Length	3.5"/88.9mm	Weight	3.8oz/108g
Overall Length	7.9"/201.8mm	Blade Steel	Black TiCn Coated 154CM
Blade Thickness	0.14" / 3.5mm	Handle Material	Green and Red G10

RIO

The RIO is a mini liner lock front flipper. It features a satin M390 blade and a black anodized titanium handle. It will be a chunky little micro folder and the fuller in the blade will be the primary deployment method.

4T5 DESIGN

Designer

Adam is the owner of 4T5 Design from Alberta Canada. He has been an avid collector of knives and edc gear since around 2014 and started 4t5 design in 2017.

He has been designing knives for quite awhile but just now starting to get into doing production runs on the designs. He loves knives with aggressive lines but maintain a sleek and pleasing esthetic. I especially like small knives.

A knife should function the way it's intended too but also be nice to look at

RIO

K3044A1 NEW

Blade Length	1.56"/39.6mm	Weight	2.13oz/60.5g
Overall Length	3.93"/99.9mm	Blade Steel	Satin CPM-S35VN
Blade Thickness	0.118"/3.0mm	Handle Material	Black Anodized Titanium

Overall Length	3.93"/99.9mm	Blade Steel	Stonewashed CPM-S35VN
Blade Thickness	0.118"/3.0mm	Handle Material	Orange G10

XL KORVID 1030

The Mini and XL Korvids are like night and day and Justin really loves the contrast in the two sizes. One that fills the pocket nicely and another that could go right in your coin pocket. The blade shape is perfect for most utilitarian tasks.

Koch Tools

Designer

Justin Koch, the owner of Koch Tools, is a well-known pocket tools designer. He has always loved knives and is so honored to have created some tools and knives that folks have enjoyed over the years. All of his designs are combined with innovation, aesthetics and utility.

XL KORVID 1030

Overall Length	8.76"/222.6mm	Blade Steel	Stonewashed CPM-20CV
Blade Thickness	0.137"/3.5mm	Handle Material	Timascus Handle

Pretatout 1032

The Pretatout means "ready for everything". As the first flipper of Kmaxrom Design, the pretatout also keeps the thumbstud for classic deployment. That knife has been regarded as strong and long edc folding knife with its 3.5" blade. The ergonomic design will give you a great sensation of power while using it.

Kmaxrom Design

Designer

Retired from K-9 units in the French army, Jonathan decided to build the knives that met his needs when he was active and then created Kmaxrom Design. His Philosophy is durability, strength and ergonomics.

PRETATOUT 1032

K1032A1

Blade Length	3.56"/90.5mm	Weight	4.09oz/116g
Overall Length	8.7"/221.1mm	Blade Steel	Black TiCn Cotaed CPM-S35VN
Blade Thickness	0.14" / 3.5mm	Handle Material	Black Anodized Titanium Handle

K1032A2

Blade Length	3.56"/90.5mm	Weight	4.09oz/116g
Overall Length	8.7"/221.1mm	Blade Steel	CPM-S35VN
Blade Thickness	0.14" / 3.5mm	Handle Material	Titanium Handle

K1032D1

Overall Length	8.7"/221.1mm	Blade Steel	Black TiCn Cotaed CPM-S35VN
Blade Thickness	0.14" / 3.5mm	Handle Material	Black Anodized Titanium Handle

Goblin XL 1016

The Goblin was inspired by the 1984 US Airforce XF-85 Goblin experimental fighter jet that was compact, yet packed a punch. There are three ways to opening the Goblin, from the front flipper tab, to the finger flick or the traditional thumb hole opening. Added to the design is a stylish pocket clip to finish it off.

Marshall Noble

Designer

Marshall has been making knives since 2002. It was not until 2015 that he started making knives full time focusing on folding knives, centering on the fit and finish and premium materials. He has always felt that form follows function, yet views knife making as an art form, they become more than just a practical knife.

GOBLIN XL 1016

K1016A1 NEW

Blade Length	3.5"/89mm	Weight	6.1oz/173g
Overall Length	8.57"/217.6mm	Blade Steel	Black TiCn Coated CPM-S35VN
Blade Thickness	0.137"/3.5mm	Handle Material	Orange Peel Finish Titanium Handle

K1016A2 NEW

Blade Length	3.5"/89mm	Weight	6.1oz/173g

Overall Length	8.57"/217.6mm	Blade Steel	Satin CPM-S35VN
Blade Thickness	0.137"/3.5mm	Handle Material	Blue Anodized Titanium Handle in Orange Peel Finish

Goblin 2016

With over built knives being so popular he wanted to make the biggest little knife he could. Little knives often do not handle large tasks well, so he made a knife with a broad blade for these large tasks, while staying compact. The Goblin was inspired by the 1984 US Airforce XF-85 Goblin experimental fighter jet that was compact, yet packed a punch. There are three ways to opening the Goblin, from the front flipper tab, to the finger flick or the traditional thumb hole opening. Added to the design is a stylish pocket clip to finish it off.

Marshall Noble

Designer

Marshall has been making knives since 2002, It was not until 2015 that he started making knives full time focusing on folding knives, centering on the fit and finish and premium materials. He has always felt that form follows function, yet views knife making as an art form, they become more than just a practical knife.

Overall Length	5.63" / 143mm	Blade Steel	CPM-S35VN
Blade Thickness	0.118" / 3.0mm	Handle Material	Bronze Titanium Handle with Holes

Reverie 2025

The Reverie is a good example of how Justin likes to mix classic and modern. The lines of the Reverie are somewhat classic. However, there are more modern additions like the symmetrical out the front flipper tab, the bolster lock, the 5 slot pattern and the materials. This is also the first time he has designed a bolster lock or used a hidden lanyard pin. Both of these design elements are pretty awesome. The bolster lock not only looks great visually but it also acts as an overtravel stop for the lockbar so that you cannot overextend it. The hidden stop pin allows those who like lanyards to use them and those who don't like them, don't have to see a big lanyard hole going through the knife.

Justin Lundquist

Designer

After graduating college with a degree in Fine Art Photography and working in that industry for over a decade, Justin Lundquist stumbled into the world of full custom handmade knives.

In 2013 Justin began slowly making his own knives. He loves the creative process of designing and physically building a beautiful functional tool that can be carried and used daily. He strives to create functional EDCs that have clean lines, shapes and transitions. Mixing classic and modern he hopes to make designs that last and stand the test of time.

REVERIE 2025

K2025A1

Blade Length	2.92"/74.2mm	Weight	3.25oz/92g
Overall Length	4.63"/117.5mm	Blade Steel	CPM-S35VN

Blade Thickness	0.14" / 3.5mm	Handle Material	Black anodized Titanium Bolster + Timascus Scales

Convict 1023

The Convict is a design he came up with when he wanted to make a wharncliffe style of blade. The blade shape and straight edge make a great cutting knife for all tasks and self defense.

Sheepdog Knives

Designer

Chris Conaway has been making knives and founded Sheepdog Knives in 2011. He started with fixed blades then moved on to making folders in 2013. Chris designs and makes custom knives that showcase his top-of-the-line creativity and attention to detail.

Hellx 1008

The Hellx is a Tactical knife that is refined and elegant. It is a full-size tactical/EDC folder. You can hold on to the back of the handle for added leverage in use, or choke up into the choil for precise cuts. The blade has a very gentle tanto profile, making the knife great for utility tasks, but it's not so drastic that it loses belly. It's a hard user with an ergonomic grip and size that makes it your perfect Tactical choice.

Model 6 1022

The Model 6 was designed to be a working knife that could be used for various task daily, but could instantly be deployed as a self defense tool. The 3" wharncliffe blade provides a reliable edge that delivers solid cutting performance in daily tasks.

Nick Swan

Designer

As a retired law enforcement officer, Nick Swan needed a knife that he could trust his life on, not only as a last line of defense but as an everyday tool. He doesn't believe in safe queens and refuses to own a knife that he won't actually use.

Mujir 1014

The Mujir is a bit of a fun blend of influences from persian style blade with a more western style handle. It is a small enough folder to carry easily and not appear to aggressive. The name Mujir roughly means helper or assistant.

Dirk Pinkerton

Designer

Honed by 18 years in the Security Industry, Dirk is famed for his effective, no non-sense, and explicitly purpose-driven models. This dynamic approach to knife designs fuels the growing demand for Dirk's creations. Dirk primarily focus his work on elegant fixed blade and neck knives. His design philosophy is simple: Big enough to get the job done, but in the smallest package. Comfortable but versatile grip. Able to handle whatever task you would expect a knife to handle.

Kratos 1024

Model Kratos was inspired by ancient Greek sword called Kopis. It has very characteristic curved, wide blade and comfortable full grip handle. Ostop mixed those features with modern style dual grinds and futuristic handle inlays.

Ostap Hel Design

Designer

Ostap Hel is a full time designer and custom knives & gear maker from Poland. Knives in his life appeared when he was a teenager, due to his growing interests in Middle Ages and all kind of weapons and knights equipment.

All his designs are based on basic geometry, smooth transitions and Golden Ratio concept. However in his collaborations he always try to experiment with new shapes and ideas to fit his partner's company unique style and manufacturing capabilities.

Weasel 2020A

Rolf came up with the designs for the Foosa and the Weasel because he wanted to return to a time when the knife was a simple, common sense cutting tool. The Weasel uses a more modern handle design along with a similar classic blade type which is modest, ergonomic, and extraordinary functional.

Rolf Helbig

Designer

Like many young boys, Rolf Helbig carried a pocket knife. In 1977 when he started his first job, helping his father in the kitchen, his chef knife was the most important tool. At that time knife steels were changing, and by doing a little research, Rolf found metallurgy to be a very interesting field, and he learned a knife is not just a knife.

He came up with the designs for the Foosa and the Weasel because he wanted to return to a time when the knife was a simple, common sense cutting tool.

WEASEL 2020A

Foosa 2020T

Rolf came up with the designs for the Foosa and the Weasel because he wanted to return to a time when the knife was a simple, common sense cutting tool. With the Foosa he focused on a classic neutral knife handle combined with a time proven classic blade type. The resulting knife is modest, ergonomic, and extraordinary functional.

Rolf Helbig

Designer

Like many young boys, Rolf Helbig carried a pocket knife. In 1977 when he started his first job, helping his father in the kitchen, his chef knife was the most important tool. At that time knife steels were changing, and by doing a little research, Rolf found metallurgy to be a very interesting field, and he learned a knife is not just a knife.

He came up with the designs for the Foosa and the Weasel because he wanted to return to a time when the knife was a simple, common sense cutting tool.

Steller 2021

Matt designed the Steller as a take on the box cutter. He made it into a frame lock flipper with a minimalist flipper tab.

Matt Degnan

Designer

Being born and raised in Southern California, Matt split his summers between the beaches of Orange County and mountains of Yosemite. It was there (in Yosemite) during a fishing trip with his father, he was given his first pocket knife. Many years later, he discovered the custom knife world and began designing and building hand-made knives in his garage.

Genesis 1010

Taking inspiration from the Tesla's Cyber truck Jerry want to make a knife that's angular, futuristic and something that doesn't get viewed as a simple knife but some what of an art piece, an art piece that doesn't lack any functionality or comforts. With a weight of only 4.97oz, Genesis is designed to be carry without any discomfort in your pocket, and it's designed to be practical, the knife can be held in multiple ways for easier control and for people references.

Jelly Jerry

Designer

Jerry, mostly being known under the designer alias Jelly Jerry. From the beginning of his designing career, He has set his goal as a knife designer to bring more unique designs that are practical but fun to look at, to use and to be a reliable companion to the user, and He also wants the person owning his knives to be able to enjoy them without having to worry about the quality of the knife, and that is why he decided to partner with Kansept knife to bring you exactly what he envisions on how knives should be, quality, fun and reliable.

Delta 1011

The Delta is Jerry's first collaboration with Kansept knives, the design was based on his inspiration from sci-fi movies aesthetic, he wanted to design something that look like it belong to a distance future, where humans is a multi-planetary species, what would their simple tools such as a knife look like?

To Jerry, the Delta is exactly what he think a knife used by an advance multi-planetary species would look like, and he has partnered with Kansept to bring that vision to real life.

Jelly Jerry

Designer

Jerry, mostly being known under the designer alias Jelly Jerry. From the beginning of his designing career, He has set his goal as a knife designer to bring more unique designs that are practical but fun to look at, to use and to be a reliable companion to the user, and He also wants the person owning his knives to be able to enjoy them without having to worry about the quality of the knife, and that is why he decided to partner with Kansept knife to bring you exactly what he envisions on how knives should be, quality, fun and reliable.

Copperhead 1017

The Copperhead was designed to be a working knife that could be used for various task daily, but could instantly be deployed as a self defense tool. The generous and ergonomic handle and slender blade make it easy to add to your EDC rotation.

Branton/Ehlers Design

Designer

Bobby Branton is the owner of Branton Knives, from Awendaw, South Carolina.

He has been a custom knife maker for over 35 years and has studied with some of the masters in the custom knife industry.

His goal is to provide "Quality Knives at Affordable Prices" to any person who uses a knife daily to complete a multitude of tasks in the course of their routines.

From casual collectors and sportsmen, to law enforcement officers, fire fighters, and soldiers who depend on their tools with their lives, they all can rely on a Branton Knife.

COPPERHEAD 1017

Pelican EDC 1018

The Pelican Edc is the perfect everyday carry folders that satisfy the maximum needs of edc knifemakers. With its 3" blade, it can be legit in a lot of countries. It is lightweight and strong enough even if the size is perfect for pocket carry. The ergonomic design offers a perfect one-hand flip opening feeling and fits in hand whatever the hand position used and the tasks needed to be done. The Pelican Edc is built to be used in any occasions without fear.

Kmaxrom Design

Designer

Retired from K-9 units in the French army, Jonathan decided to build the knives that met his needs when he was active and then created Kmaxrom Design. His Philosophy is durability, strength and ergonomics.

Accipiter 2007

Mini Accipiter is the scale down version of Accipiter which is a beautiful knife with a very clean design. The blade has a gentle drop point design in CPM-S35VN steel that slices, pierces, and cuts like a dream. It is a front flipper with a stunning design for managing any daily cutting chore. Mini Accipiter is equipped with an ergonomic titanium handle with an aesthetic inlay on the front side. The blade flipper provides rocketing blade deployment with a reinforced frame lock for strong blade lock up. A comfortably contoured titanium pocket clip completes the outstanding design.

Kryo 1001

The Kryo series has both a premium and budget-friendly versions differing in materials, blade shape and handle finish. Its blade provides a reliable edge that delivers solid cutting performance in outdoor and urban environments alike. It also comes with a reversible one-piece 3D milled titanium pocket clip for easy carry. The ball bearing system provides smooth opening and a frame or liner lock firmly secures the blade in the open position.
