**FWACB-L** fits Cart Circumference **EQUAL** to or **GREATER** than **150"**

## Measuring Instructions for Custom-made Bumper Guards

Determine the **CIRCUMFERENCE** by measuring around the widest point of each cart's frame or base.

Item # FWACB

Bumper Guard for Forbes' style Housekeeping Carts

**IMPORTANT:** Exact measurements are required.

**Widest point of  
cart's frame or base**

### **VERY IMPORTANT:**

**DO NOT** calculate circumference by adding together the cart's length and width dimensions, as this method only works for an exact rectangle (and not for carts with rounded corners).

### **IMPORTANT:**

- Physically measure each cart.
- **EXACT** measurements are required.
- **Custom-made items are non-returnable.**
- The following measurements are required for EACH CART SIZE:

- **CIRCUMFERENCE**
- **LENGTH and WIDTH**

### **HELPFUL TIP:**

- Wrap string around the widest point of cart's frame. (Use tape to secure the string in place.)
- Cut or mark string.
- Measure string's length with measuring tape.
