Specifications

Made for Wire style Laundry Basket Carts

WIRE-S fits Cart Circumference **LESS** than 100"

WIRE-L fits Cart Circumference **EQUAL** to or **GREATER** than 100"

Measuring Instructions for Custom-made Bumper Guards

Determine the **CIRCUMFERENCE** by measuring around the widest point of cart's lip / upper edge.

Item # WIRE

Bumper Guard for Wire Laundry Carts

IMPORTANT: Exact measurements are required.

Widest point of cart's lip / upper edge

VERY IMPORTANT:

DO NOT calculate circumference by adding together the cart's length and width dimensions, as this method only works for an exact rectangle (and not for carts with rounded corners).

IMPORTANT:

- Physically measure each cart.
- **EXACT** measurements are required.
- **Custom-made items are non-returnable.**
- The following measurements are required for EACH CART SIZE:
 - CIRCUMFERENCE
 - LENGTH and WIDTH

HELPFUL TIP:

- Wrap string around the widest point of cart's upper edge. (Use tape to secure the string in place.)
- Cut or mark string.
- Measure string's length with measuring tape.
