HCBG-M fits Cart Circumference **GREATER** than **138"** & **LESS** than **150"**

HCBG-L fits Cart Circumference **EQUAL** to or **GREATER** than **150"**

Measuring Instructions for Custom-made Bumper Guards

Determine the **CIRCUMFERENCE** by measuring around the widest point of each cart's frame or base.

Item # HCBG

Bumper Guard for Rubbermaid® style Housekeeping Carts

IMPORTANT: Exact measurements are required.

Widest point of cart's frame or base

VERY IMPORTANT:

- Physically measure each cart.
- The circumference is the distance around the widest point of the cart's top edge.
- **DO NOT** calculate circumference by adding together the cart's length and width dimensions, as this method only works for an exact rectangle (and not for carts with rounded corners).

IMPORTANT:

- **EXACT** measurements are required.
- **Custom-made items are non-returnable.**
- The following measurements are required for EACH CART SIZE:
 - CIRCUMFERENCE
 - LENGTH and WIDTH

HELPFUL TIP:

- Wrap string around the widest point of cart's upper edge. (Use tape to secure the string in place.)
- Cut or mark string.
- Measure string's length with measuring tape.
