### THE NEW FOOD FIGHT

In the spirit of *Super Size Me*, *Forks Over Knives*, and *Fed Up* comes a new documentary that exposes how big corporations are fighting against healthier eating. In *PlantPure Nation*, nutrition scientist T. Colin Campbell, Ph.D., and his son, director Nelson Campbell, emphasize the health benefits of a plant-based diet while exploring corporate and government resistance to it. The movie will appear in select theaters starting July 4.
