### Frames Quilt

NOTE THE FOLLOWING CORRECTIONS AND ADDITIONS on the block diagrams.

ALTERNATE BLOCK FIVE

5

Square up to 4" x 7"

ALTERNATE BLOCK SIX

ALTERNATE BLOCK SEVEN

Square up to 15-1/2" x 19-1/2"

ALTERNATE BLOCK TEN

Make four half square units for the corners from 3-3/8" squares.

As for the discrepancies between the blocks shown and the quilt pictured, let me explain.....

I first made the Frames quilt shown for my son. When I remade it with the Vintage Homestead fabric (as shown for the Vintage Sampler), I modified several of the blocks in order to get the most use of the panel print. However, given the amount of space it took to write the instructions for the sampler quilt, I decided to combine the two quilts into one set of instructions. In so doing, I had to modify measurements and sizes of some of the blocks in the Frames quilt to match the measurements in the other. Follow me? In doing so, there are some differences between the blocks / measurements shown in the book and the finished quilt pictured.

Some of these are:

- there are only 8 blocks in the Frames quilt shown but 10 blocks in the instructions.
- the number of strips surrounding each block.
- the spacing between the blocks.
- the overall finished size.

In addition, no diagram is included for Block 5. This is because it is constructed in the exact same way as in the Vintage Sampler.

I tried to explain this in the little paragraph under the title of the quilt on page 31, but now realize that I also should have put a note about it with all the block diagrams.

Bottom line is, your quilt will look a bit different than the one shown.
