

Follow these steps to obtain the required SAN switch details before feature upgrade can be issued.

From Switch Console Port:

1. Connect to your switch via:
 - a. Serial port and terminal emulator application or
 - b. Ethernet and telnet
2. Login to the switch as the switch administrator:
 - a. Default ID is **admin**
 - b. Default password is **password**

swd77 login: admin
Password: password

3. Enter the following commands:

```
swd77:admin> chassisshow
```

```
swd77:admin> wwn
```

```
swd77:admin> licenseidshow
```

```
swd77:admin> licenseshow
```

```
swd77:admin>
```

4. **Switch Serial Number obtained from the switch label.**

Return the above switch information so feature key can be issued.
