

Rocker Ski Rack™ Mounting Instructions

**ROCKER SKI RACK™ IS TO BE MOUNTED TO WOOD WALL STUDS.
NOT RECOMMENDED FOR OUTDOOR APPLICATIONS.
INSTALL & USE ROCKER SKI RACK™ AT YOUR OWN RISK.**

Included:

(4) - 3" Wood Screws

(4) - 3/4" Wood Screws

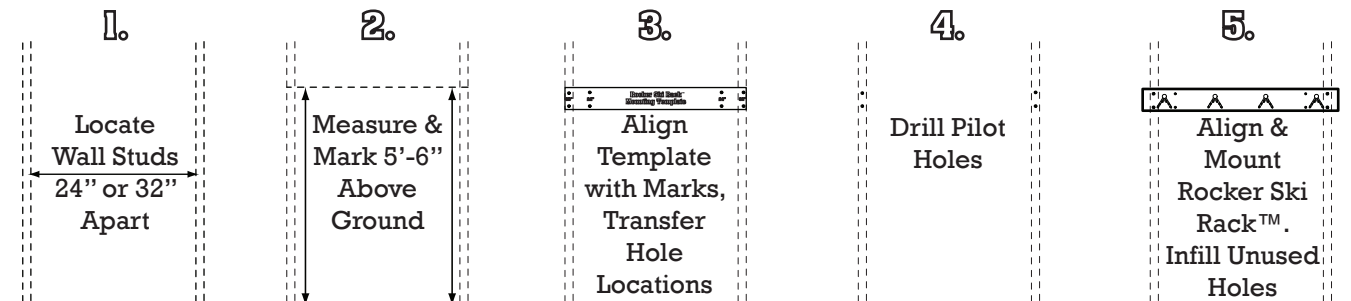

(1) - Rocker Ski Rack™ Mounting Template

(1) - Rocker Ski Rack™

- Find two wall studs either 24" or 32" inches apart in the area you would like to mount your Rocker Ski Rack™. Use a stud finder or similar method to assist in the locating of studs. Mark the center of the studs. Rocker Ski Rack™ will only work properly when mounted to wall studs 24" or 32" apart.
- Measure from the ground surface up approximately 5'-6" along the wall studs. Mark this height. Ensure that this mark corresponds to the center of the wall stud.
- Align the top of the Rocker Ski Rack™ Mounting Template with the 5'-6" marks. Use a level for fine tuning. Align holes of the Rocker Ski Rack™ Mounting Template to the center your wall studs. Transfer the location of the (4) holes to your wall. Rocker Ski Rack™ Mounting Template holes which do not align with wall studs should not be marked.
- At each of the (4) marks, drill a 1/8" diameter pilot hole approximately 2" into your wall studs.
- Align the screw holes of the Rocker Ski Rack™ with pilot holes. Attach the Rocker Ski Rack™ to wall studs with provided 3" wood screws. Do not over-tighten. Infill holes which do not align to wall studs with 3/4" wood screws.
