Reject a call	Press and hold the MFB button on either earbud for 1 second.
Voice assistant activation	Press the MFB button twice on either earbud while connected to a smart device.

HOW TO ENSURE A PROPER FIT

Ear-tips in different sizes

S M L
Using appropriate size ear-tips is critical to isolate external noise and achieve a snug, secure fit. It is common for a user to have two different sized ear canals, so try on one ear-tip at a time to find the best fit for each ear.

To get the best possible fit with your **X3 Pro** earbuds, gently push the earbuds into your ears and adjust the headset until it fits comfortably. You should notice a drop in ambient noise when the ear-tip has been placed correctly. With a proper fit, you'll notice more range when listening to music.

To change the silicone ear-tips:
1. Turn over the upper cover on the ear-tip.

2. Rotate and firmly push the ear-tip tube to cover the ear-tip pillar.

3. Turn the upper cover of the ear-tip back on the nozzle.

CHARGING

The X3 Pro model comes with protective stickers on the charging contacts of each earbud to prevent the battery from deteriorating prematurely. Please remove these stickers prior to charging the earbuds.
A fully charged case can recharge a pair of dead earbuds a total of four times. Once fully charged, your earbuds will provide you with 7 hours of playtime at maximum volume and up to 9 hours at medium volume. When the battery is running low, you will hear the "Battery Low" voice prompt.

To charge the case

Be sure to use a 5V DC, 0.5 - 1A adapter or charger. Using a power source with lower power will increase the overall charge time. Connect the charging case to the power source with the USB Type-C cable. The case has 4 blue LED indicator lights. One indicator light will flash while charging. The indicator lights will show the charging level: 4 LED = full battery, 3 LED = 75% of the battery, 2 LED = 50% of the battery, 1 LED = 25% of the battery. To check the charge level of the charging case, open or close the case lid. The case battery indicator will stay on for 3 seconds. It takes about 2 hours to fully charge the case.

To charge the earbuds with the charging case

When the earbuds' battery is low, you'll hear the "Battery Low" voice prompt.
Put the left and right earbuds into the slots in the charging case. The earbuds will turn OFF automatically. The case will immediately start charging the earbuds. The red indicator lights on the earbuds will turn on. It takes about 2 hours to charge the earbuds. When the earbuds are fully charged, the blue indicator lights will light up for 30 seconds and then turn off.

SETTING UP YOUR TREBLAB X3 Pro

To turn the earbuds ON

1. Once removed from the charging case, your earbuds will turn on automatically.

2. You can also turn them on by holding the **MFB** button on both earbuds for 2 seconds.

3. You will hear the "Power ON" voice prompt in both earbuds and the "Pairing" prompt in the right earbud. A few seconds later, the "Pairing" prompt will sound in the left earbud as well. The LED indicator light on the right earbud will blink blue every second and the light on the left earbud will flash blue and red.

4. When the earbuds are connected to the source device, you will hear the "Connected" voice prompt.

To turn the earbuds OFF

1. Put the left and right earbuds into the slots in the charging case. The earbuds will turn OFF automatically.

2. Alternatively, press and hold the **MFB** on both earbuds for 3 seconds.

You will hear the "Power OFF" voice prompt, and the red LEDs will light up and then go off.

PAIRING

You can pair the **X3 Pro** earbuds with your device either together or separately. Using only one earbud at a time will help you extend the overall playtime. Please read the instructions below to make the pairing process smooth and easy.

Note: To ensure the optimum performance, we recommend keeping as short a distance as possible between the Bluetooth device and the **TREBLAB X3 Pro**.

To pair both earbuds

1. Take the earbuds from the charging case. You will hear the "Power ON" voice prompt in both earbuds and the "Pairing" prompt in the right earbud. A few seconds later, the "Pairing" prompt will sound in the left earbud as well.

2. Activate Bluetooth on the device, scan/search for **TREBLAB X3 Pro_L**, and click CONNECT.

3. If prompted by your device to connect, select Yes.

4. You will hear the "Pairing successful" voice prompt in the left earbud and "Connected" in both earbuds.

After that, you may see a prompt to pair the right earbud (**TREBLAB X3 Pro_R**). If prompted, pair the right earbud as well. This will enable you to use the earbuds independently from one another in the future.

When you turn the earbuds ON, they will attempt to reconnect with the most recently connected device. If reconnection does not happen automatically, the earbuds will attempt to reconnect to the next device in the pairing list. You can only connect and play audio from one device at a time. But you can save up to seven connected devices in the pairing list.

To pair one earbud only

1. Take one earbud out of the charging case. You will hear "Power ON" and in a few seconds, "Pairing".

2. Activate Bluetooth on the device, scan/search for **TREBLAB X3 Pro_L** or **TREBLAB X3 Pro_R** (depending on which earbud you are trying to connect), and click

CONNECT.

3. If prompted by your device to connect, select Yes.

4. You will hear "Pairing successful" and "Connected" in the earbud after the earbud has been successfully connected.

Note: The "Pairing successful" prompt is heard only when you pair the earbuds to a device for the first time.

No matter what earbud is connected to the device, when you turn ON the second earbud, it will automatically connect to the first one.

AUDIO PLAYBACK

To pause and resume playback, press the **MFB** button.

To adjust the volume, press and quickly release the **Volume +** button on either earbud to turn the volume up and the **Volume -** button to turn the volume down.

To change tracks on the **X3 Pro,** press and hold the **Volume +** button on either earbud to play the next track and the **Volume -** button to play the previous track.

PHONE CALL MANAGEMENT

The **TREBLAB X3 Pro** can be used to make and receive phone calls when connected via Bluetooth. Audio playback will be paused during calls.

To answer a call:	Press the **POWER** button.
To reject a call:	Press and hold the **POWER** button for 1 second.
To end a call:	Press the **POWER** button.

VOICE ASSISTANT SUPPORT

Your **TREBLAB X3 Pro** earphones are compatible with Siri, Alexa, Google Voice Assistant and others. To use a voice assistant, press the **MFB** button twice on the right or left earbud.

TROUBLESHOOTING

Problem	Solution
My device isn't pairing with the TREBLAB X3 Pro	Make sure your **X3 Pro** earbuds are not paired with any other device, as they can only pair with one device at a time.
	Make sure that the distance between your device and the earbuds is less than 33 feet / 10 meters.
	If your **X3 Pro** is in pairing mode and the left or right earbud is flashing blue and red but the **X3 Pro** can still not be found by your device, please restore your headset to the factory settings following the instructions on the next page.
Frequent disconnection and noise	Make sure that the distance between your device and the earbuds is less than 33 feet / 10 meters.
	Make sure that nothing is blocking the signal between your device and your **X3 Pro** earbuds.

	If the earbuds are ON but disconnected from the device for longer than 5 minutes, they will automatically turn OFF to save power.
I can't turn my earbuds ON	Please make sure the earbuds are charged, if they're not, charge them and try again.
My earbuds do not charge	Please check to see if there are any protective stickers on the charging contacts of either earbud. If there are, remove them and try to charge the earbuds once again.
	Clean the charging pins in the charging case and the contacts on the earbuds with a slightly damp washcloth when they are turned off (we recommend using water or a specially designed cleaning fluid sold for electronics).
	Try charging the case with another USB Type-C cable, power source, or adaptor (if available).

I can't connect the earbuds to my device	Make sure that the **TREBLAB X3 Pro** earbuds are charged.
	Go to your device's Bluetooth menu and delete all saved devices from the list by tapping "Forget this device".
	Turn your device's Bluetooth OFF, then turn it ON again: **TREBLAB X3 Pro_L** and **TREBLAB X3 Pro_R** won't be on the list of devices.
	Restart your device.
	Take the **TREBLAB X3 Pro** earbuds out of the charging case, this will power them ON.
	Follow the instructions for connecting (section "PAIRING").
	If the problem persists, try to reset the **X3 Pro** to the factory settings by following the instructions on the next page.
Muffled microphone	Please check to see if there are protective stickers on the charging

contacts of either earbud, as the microphone is located between the contacts. If there are, please remove them and try your call again.

RESTORE THE FACTORY SETTINGS

To restore the earbuds back to the factory settings:

1. Turn the earbuds OFF.
2. Press and hold the **MFB** button on both earbuds for 11 seconds. You will see the purple light and hear the sound prompt.
3. Put them back into the charging case.
4. Now the earphones are restored to the factory settings and ready for use.

Note: When you take the earbuds out of the charging case for the first time after the reset is done, the LED indicator lights on the earbuds will flash rapidly. This means that the earbuds are establishing a connection between one another.

SAFETY RULES

◑ Never disassemble or modify your **X3 Pro** for any reason. Doing this may cause the device to malfunction or even become combustible. The damage to your device can void your manufacturer's warranty.

◑ Do not charge the earbuds when they are wet. Make sure to dry off the earbuds before charging.

◑ Avoid exposing the **TREBLAB X3 Pro** to extreme temperatures (below 37°F / 3°C or above 112°F / 45°C). Extreme temperatures can deform the components inside the **X3 Pro**, reducing the battery life and the lifespan of your new earbuds.

◑ Avoid putting the device's LED lights close to the eyes of children or animals.

◑ Do not use your **X3 Pro** during a thunderstorm. Thunderstorms could cause them to seriously malfunction and increase the risk of electric shock.

BATTERY INFORMATION

- Your device is powered by rechargeable batteries.
- Unplug the charging case from the electrical plug when not in use.
- If left unused, a fully charged battery will lose its charge over time.
- We recommend that you fully charge your earbuds twice a month to ensure the battery's integrity.
- Please do not leave the device (and the charging case) in hot or cold places, such as inside a closed car in the summer or winter as this will reduce the capacity and life of the batteries.
- Do not expose the batteries to fire as they may explode.
- Batteries may also explode if damaged.

RECYCLING

Your damaged or broken earphones can be recycled and we encourage you to do so to keep our planet clean. Where can you go to do this?

In the **US**, there are a couple of options:

1. Best Buy has a recycling program. Just take the broken earbuds with you the next time you visit a Best Buy store. This link will help you to find the location nearest you: https://www.bestbuy.com/site/store-locator/

2. Check for other possible locations near you by visiting these websites (just enter your ZIP code to find a location):

https://www.call2recycle.org

https://search.earth911.com

https://recyclenation.com/find

https://www.cta.tech/Consumer-Resources/Greener-Gadgets

In **Canada**, please visit the links below:
