Using the correct size eartips and ear-fins is critical for maximum external noise isolation and a snug, secure fit. It is also common to have different sized ear canals so try the eartips and ear-fins one at a time to find the best fit for each side.

1. Identify the left and right earbuds. Look for L/R mark near the round hole in the ear-fin, which is used to fix it on the earphone. Then choose the size that best fits each ear - S, M or L.

2. Place the assembled earbud with the eartip in your ear canal and tuck the ear-fin into the front ear fold facing up. Adjust the eartips to a suitable angle until you have a tight and snug fit.

3. Please try various supplied eartips and ear-fins to find comfortable and better fit.

Using the Charging Dock

1 Charging dock power ON/OFF

a. Charging dock power on/off - Single click power button to turn on the charging dock, left and right earbud charging indicators will continuously and slowly flash for several times while the earbuds are charging: 4 times = full battery, 3 times = 75% battery, 2 times = 50% battery, 1 time = 25% battery.

b. Long press power button for 1 second until left & right earbud charging indicators quickly flash 3 times and go off, the charging dock is now turned off.

c. The charging dock will turn OFF automatically after being idle for 8 hours (After taking the earbuds out from charging dock or the earbuds get fully charged)

d. You can use the charging dock to charge your earbuds while it's connected to a power source. Also, your charging dock has a built-in battery and it can be used to recharge your earphones.
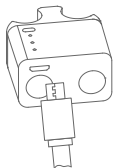

2 Charge the earbuds with charging dock

a. Earbud battery low - On iPhone and some Android smartphones, you can check earbud battery level on the phone

b. When earbud battery is at low level, there will be a 'Battery Low' voice prompting every 2 minutes in your earbuds until you put them to charge, and a red light flashing instead of the Bluetooth connection blue indicator.

Using the Charging Dock

c. Plug left & right earbuds into the correct slots on charging dock (the pins on charging dock should touch the copper sheet on earbuds).

d. Turn ON the charging dock. Earbuds will be turned OFF automatically, now charging dock starts to charge the earbuds. Left and right charging indicators on the charging dock will flash every 1 second. When earbuds are fully charged, the charging indicators will stop flashing and go OFF.

③ Charging the dock

When charging dock gets connected to power source, red charging indicator of the charging dock will turn ON. The indicator will go OFF after the dock is fully charged.

④ How to put in/take out the earbuds from the charging dock.

As shown in the picture, direct the effort perpendicularly to the charging dock.

power button
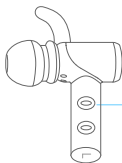

Left

Left earbud
power button

1. Turn ON - Long press the POWER button for 1 second. You will hear "Power ON" voice prompt, blue LEDs will start flashing.

2. Turn OFF - Long press the POWER button for 4 seconds. You will hear "Power OFF" voice prompt, red LEDs will light up for 1 second and then go off.

3. Put the earbuds to the charging dock, they will turn OFF automatically.

4. Take the earbuds out from charging dock, they will turn ON automatically.

Pairing

You can pair X2 earbuds to your device either together or separately.
Please read the instructions below to make this process smooth and easy.

1 **Pairing 2 earbuds.**

a. Connecting Right and Left earbuds.
Left and right earbuds were previously paired with each other on the factory.
· Turn ON your right earbud by long pressing the POWER button, you will hear the "Power ON" voice prompt, then release the button.
· Turn ON you left earbud by long pressing the POWER button, you will hear the "Power ON" voice prompt, then release the button.
· The left earbud will automatically connect to the right earbud. You will hear "Connected" voice prompt in left earbud after successfully connecting.

b. Re-connecting Right and Left earbuds.
If left and right earbud do not get reconnected automatically, you will need to pair them again.
· Long press POWER buttons on left and right earbuds simultaneously for 1 second until you hear "Power ON" voice prompt.
· Double click both POWER buttons continuously, you will hear "Beep" sound from both earbuds. Red and Blue LED-lights will start flashing quickly.
· Put both earbuds close to each other and wait for them to connect. After successful connection, both earbuds will start flashing blue every 7 seconds.

c. Connecting earbuds to the device
· Long press POWER button on the right earbud for 4 seconds.
· You will hear "Power ON" in the right earbud. Keep pressing POWER until you

hear "Pairing" voice prompt; red and blue LED lights will flash rapidly.
• Activate Bluetooth on your device and keep it within 3 feet / 1 meter from the earbuds while pairing.
• Using your Bluetooth enabled device, scan/search for available Bluetooth devices (check your device's manual if you're unsure how to do this).
• Select TREBLAB X2 from the device list
• If prompted by your device to connect, select Yes.
• You will hear "Connected" from right earbud after successful connection.
• Long press POWER button on the left earbud for 1 second.
• You will hear "Power ON" voice prompt in the left earbud.
• Wait 5-10 sec., the left earbud will automatically connect to the right earbud.
• You will hear "Connected" from left earbud after connecting.
• When paired, LED indicators on both earbuds will flash blue every 7 seconds.
• The next time you switch on the earbuds, they will automatically search for and attempt to connect to the last paired device.

2 Pairing only right earbud

• Long press POWER button on the right earbud for 4 seconds.
• You will hear "Power ON" voice prompt in the right earbud. Keep pressing POWER button until you hear "Pairing" voice prompt.
• Red and blue LED lights will flash rapidly.
• Activate Bluetooth on your device and keep it within 3 feet / 1 meter from the earbud while pairing
• Using your Bluetooth enabled device, scan/search for available Bluetooth devices (check your device's manual if you're unsure how to do this).
• Select TREBLAB X2 from the device list.
• If prompted by your device to connect, select Yes.
• You will hear "Connected" from right earbud after successful connection.

3 Pairing only left earbud

· Long press POWER button for 1 second until you hear "Power ON ".
· Long press MODE button for 4 seconds until you hear "pairing mode ". Red and blue LED lights will flash rapidly.
· Activate Bluetooth on your device and keep it within 3 feet / 1 meter from the earbud while pairing.
· Using your Bluetooth enabled device, scan/search for available Bluetooth devices (check your device's manual if you're unsure how to do this).
· Select TREBLAB X2 from the device list.
· If prompted by your device to connect, select Yes.
· You will hear "Connected" from right earbud after connecting.

When you are using only left earbud, some remote control functions (answer call / reject call / hang up call / volume up / volume down) will not be available. You will still be able to answer / reject phone calls or control volume using your device.

Phone calls

Note: Even when you use both earbuds, only the right earbud produces sound during phone calls, this is completely normal.

· To answer an incoming call: Single click right POWER button.
· To reject an incoming call: Single click right MODE button.
· To finish the conversation: Long press right MODE button for 1 second. while on the line

| Siri | **TREBLAB X2 headphones are Siri-compatible.** To use Siri: Long press right MODE button for 1 second. |

Troubleshooting

Device doesn't find TREBLAB X2
• Ensure the X2 are in pairing mode, and LEDs are flashing blue and red. Refer to previous section on how to enter into the pairing mode.
• If X2 is in pairing mode and flashes blue and red, but is still not found by your device, please restart your device and the headset.
Frequent disconnection and noise

Frequent disconnection and noise
• Ensure the distance between your device and the headphones is less than 38 feet / 12 meters.
• Ensure nothing is blocking the signal between your device and your Bluetooth earbuds.
• If the earbuds are ON, but disconnected from the device for longer than 3 minutes, they will automatically go OFF to save power.

Can't turn the headphones ON
Please make sure the earbuds are charged, if not – charge them, and try again.

Can't connect the earbuds to your device
• Ensure TREBLAB X2 are fully charged.
• Go to your device's Bluetooth menu and delete all saved devices from the list by clicking "Forget this device".
• Turn your device's Bluetooth OFF, then turn it back ON: TREBLAB X2 won't be on the list of devices.
• Power OFF device, then turn back ON.
• Take TREBLAB X2 off the charging dock, this will set them to Power ON.
• Enter the earbuds into the pairing mode and follow instructions for connecting (page 10).

Safety Rules

• Never disassemble or modify your headset for any reason. Doing this may cause the headset to malfunction or become combustible. The damage to your device can void your manufacturer's warranty.
• Do not allow your device to get wet - liquids can cause serious damage. Water damage to your device can void your manufacturer's warranty.
• Excessive sweating may damage the product. Make sure to wipe the headphones dry before charging.
Avoid exposing TREBLAB X2 to extreme temperatures (below 37˚F / 3˚C or above 112˚F / 45˚C). Extreme temperatures can cause deformation of X2 components, reduce battery life and the lifespan of your new earphones.

• Avoid putting device's LED lights close to the eyes of children or animals.
• Do not use your X2 during a thunderstorm. Thunderstorms can cause serious malfunction and increase the risk of electric shock.

NOTE: Use only the provided USB/micro USB cable to charge.

Battery Information

- Your device is powered by a rechargeable battery.
- Unplug the charging dock from the electrical plug when not in use.
- If left unused, a fully charged battery will lose its charge over time.
- We recommend a full charge twice a month to ensure battery integrity.
- Please do not leave the device (and charging dock) in hot or cold places, such as in a closed car in summer or winter conditions because this will reduce the capacity and lifetime of the battery.
- Do not dispose of the batteries in a fire as they may explode.
- Batteries may also explode if damaged.
