## OUR PROCESS

### What are your top skin concerns?

Each facial treatment for first time clients begins with a Q&A discussion of your specific goals and concerns. Through a series of comprehensive questions, responses given provide insight into individual skin type needs and deficiencies.

### What do we see in your skin?

An analysis of your skin before and after makeup removal, with the use of a magnified light, allows for a thorough examination to precisely evaluate what is going on above and beneath the surface of the skin.

### What treatment is best for you?

Your esthetician will make a recommendation for a professional facial or treatment based on the unique needs of your skin (taking into consideration your personal desires and budget).

### What's your skin type?

At the conclusion of your service, your esthetician will choose your skin type, provide a future treatment plan addressing your skin issues, concerns and goals, along with at-home product suggestions from the Renée Rouleau line to reveal healthy, glowing and beautiful skin for a lifetime.

### What's your skincare IQ?

Your esthetician will suggest recommended reading through our online educational resource so you can learn how to achieve your personal skin care goals long after the treatment is over.

Renée Rouleau (pronounced Roo-Low), celebrity esthetician and founder of her eponymous skin care collection, knows that great skin is rarely achieved with a “one size fits all” viewpoint. Renée’s 25 years of hands-on experience as a celebrity esthetician and trusted skin care expert have helped her create real-world solutions—products that are formulated for nine different types of skin so your face gets exactly what it needs to look and feel its best. Consider it the perfect ritual, just for you.

*“One size does not fit all. Beautiful, healthy, and glowing skin requires choosing products formulated for the needs of your skin. And it all begins with our 9 skin types.”*
