## SOLAR EXPERIMENTERS KIT FOR MICRO:BIT KIT

V1A - 2021-06-23

The MonkMakes Solar Experimenters Kit for micro:bit is a project kit that allows you to experiment with harvesting energy from the sun and other light sources. It consists of a solar panel to harvest the energy, a solar store that stores the harvested energy, and a low energy light bulb and a motor that can be driven with the energy that you harvest.

### Contents

Qty	Item
1	10V Solar panel
1	Solar Store board
1	3V LED light Bulb
1	Set of alligator clip leads (10 leads)
1	Small motor with fan
1	Booklet (A5)

### Dimensions and Weight (closed box)

		Units
Length	275	mm
Width	170	mm
Height	45	mm
Weight	335	g

### Compliance
