

Curtain & Blind Care

WEFT

# WEFT TEXTILES | CARE INSTRUCTIONS

---

Weft Textiles work closely with Australian based family-owned manufacturing companies to produce all soft furnishings. We are committed to producing small scale, custom made soft furnishings in support of the slow fashion movement.

We are focused on sustainable textile applications, working with blends of natural fibers. These are fabrics that have a different make up to synthetic fibers, meaning they need to be treated in particular ways to preserve the fabrics integrity. Below are care instructions which can be applied for both fabrics specified for your curtains and blinds.

Curtains & Sheers Maintenance:

FAQ: My curtains fabric has some creases, will these disappear?

A: Whilst all curtains are pressed before leaving the workroom, inevitably curtains may gather creases during transport. Some fabric compositions may react worse than others; linen for example. Curtains will - /+ 5% due to weather and composition of fabric. We recommend to sit with curtains for all seasons to let them naturally drop as natural fibers and natural fiber blends have a memory and are living fabrics, meaning they will alter slightly to their environment.

These creases should drop out over the next 2-3 weeks, but if deep creases remain after this time please call 0423071381. In time all curtains will soften and relax, creating the appropriate drop.

FAQ: How do I wash my curtains?

A: It is recommended curtains be professionally dry-cleaned, seeing as by using this service, any cleaning is done so at the risk of the cleaner. Please understand there is always a very high risk of shrinkage when curtains are cleaned, even when dry-cleaned, and this shrinkage is NOT covered by our warranty. If you are unsure find the care code on the tag of your curtains and call Weft on 0423071381 for advice.
