Potted Gnomes

By M.D. Handfield Designs Inc.

Colour Sorting and Learning

Basic Colours

Say the colour name and have child repeat it

Basic Colour Matching

Have child put the peg dolls in their matching pots

Colour Mixing

Have child sort primary colours from secondary colours.

Primary colours: red, blue yellow

Secondary colours:

orange (red mixed with yellow)

purple (red mixed with blue)

green (yellow mixed with blue)

Colour Opposites

put opposite colours together according to the colour wheel.

Spatial Learning Recognition

In/Out/Front/Back/ Left/Right/Above/Below

Have child put peg dolls in the proper positions relating to their pots.

Tabletop Bowling

Set the peg dolls up as pins and practice bowling away. Each player rolls 2 balls to try to hit all pins down. Works best if you set them up on one side of a coffee table or dining room table and roll the balls from the other side. Use the felt mat provided, to protect furniture.

Imaginative Play

Children Learn best through imaginative play. By allowing free play with the set, children can come up with all sorts of ideas on their own of how to play. With the ability to freely explore, you might find yourself being entertained by a circus, pirates or more.

Pattern Recognition

Pots can be stacked in various ways. Use the pictures provided and have the child stack the pots in the same way as shown. Then let them be creative and see what other ways they can stack the pots.
