I am always striving to reduce the negative environmental impact of the choices I make when shopping and have switched to using reusable shopping bags.

To help me avoid single-use plastic bags when I shop for fresh produce, it would be really practical and convenient if you would consider offering customers like me the option of purchasing Rethink® Reusable Fresh Produce Bags to use, and re-use, in your store.

Reusable Fresh Produce Bags are made from Certified Organic cotton and are 100% biodegradable. The weights of the bags are pre-entered at check-out (from participating retailers), so I only pay for my fresh produce and not the extra weight of the cloth bag. These bags are strong and sturdy, and the drawstring secures produce in the bag enabling customers to fill completely with a single item.

Rethink® Reusable Fresh Produce Bags was the proud recipient for “Best Packaging” 2013 Unpackit Packaging Awards which was decided by a landslide win of more than 15,000 votes.

Please contact Rethink® directly to lodge an enquiry and place an order:
