## FAQ

**1. Headphone can not be paired with mobile phone.**

- Please check whether your headphone is in pairing mode or reconnection mode.
- Check whether Bluetooth search function of your phone is opened.
- Check your mobile device's Bluetooth menu and delete/forget the headphone, reconnect the headphone following instructions of user manual.

**2. Headphone can not be switched on.**

- Please check the battery status of your headphones.

**3. Can I change the battery for the headphone?**

- No, this headphone uses a built-in Li-Polymer battery. It can not be removed.

**4. Can I use headphone while driving?**

- For safety reasons we recommend not to use over-ear headphone to avoid

distraction while driving.

**5. Headphone disconnect with mobile phone within 10 meter.**

- Check if there is metal or other material within relatively close range. It may interfere Bluetooth connection, as Bluetooth is a radio technology that is sensitive to objects between the headphone and the connected device.

**6. I can not hear any sound from my headphone even they are connected via bluetooth to my phone/computer.**

- Check volume of your headphone, and computer/ mobile phone.
- Check whether the output channel of your computer is Bluetooth Audio Device and that Bluetooth function of you computer supports A2DP profile.
