General description
Coloured, low viscosity, potting, encapsulation and knot/wood repair polyamide adhesive.

Tecbond 7718 has a very low viscosity that sets very hard. It is used for two main applications. Potting and encapsulation in the electronics industry as well as knot filling/wood repair in the woodworking industry.

Potting and Encapsulation: Tecbond 7718 has been tested for use in electrical / electronic applications and the electrical characteristics are listed below. The use of hotmelt speeds up assembly as there is no mixing and any unused adhesive remains in the glue gun ready for next time, so there is no waste. Setting time is usually less than 2 minutes. Coloured versions of the adhesive are available which can be useful to hide components or colour code for traceability.

Knot Filling / Wood Repair: The flow characteristics, hard setting and low shrinkage nature of Tecbond 7718 make it ideal for filling cracks and voids often found around knots in many types of wood. The adhesive is applied by glue gun, trimmed with a sharp knife or Mouseplane® and then sanded as usual before finishing. The adhesive is available in different colours to match the wood.

Technical characteristics

| Adhesive type: | Synthetic polymer based hotmelt |
| Colour: | 12mm Amber, Beige, Black, Cola, Cream, Oak, Bulk is only available in Amber. |
| Molten tack: | Medium |

</tbody>
</table>

**Storage**

Store in a clean dry place at temperatures between 5°C and 30°C with boxes closed. Do not expose to direct sunlight or localised heat sources such as radiators or hot pipes.

**Removal of glue**

Assembled components can be separated by heating assembly to a temperature slightly above the heat resistance figure.

**EVA & Polypropylene:**

Residues of EVA and polypropylene based hotmelts can be removed from components with white spirit.

**Polyamide:**

Residues of polyamide based hotmelt can be removed from components with acetone.

**PUR:**

Prior to cross linking adhesive can be removed with white spirit or ketone. Once fully cross linked the adhesive cannot be easily removed.

**Please note**

The information contained on this data sheet is for guidance only. It is the result of careful laboratory evaluations by trained and qualified staff using British Standard or similar test methods. However, no warranty is expressed or implied regarding the accuracy of the data or the suitability of the adhesive for any specific purpose. In every case, we strongly recommend that the user shall make their own test to determine to their own satisfaction the suitability of the adhesive for their particular purpose. Neither the seller nor manufacturer shall be liable for any injury, loss, damage, direct or consequential arising out of the use or inability to use the product. Further information is always available to help solve your adhesive problems. Should you require any further information on our adhesives please contact your nearest distributor.
