

CLEANER

Part number: U7588

APPLICATORS: HB 700K/KD-Series

APPLICATION:

For flushing out applicator units after the use of PUR hot melts

DIRECTIONS FOR USE:

Allow all adhesive to be extruded completely. Then fill the unit with the cleaner and melt. The entire amount of cleaner has to run through the hose and nozzle, then repeat the procedure to ensure that all hot melt residues have been removed.

DESCRIPTION

Type	Based on Copolymer
Color	Colourless Blue

TECHNICAL DATA

Softening point	Ca. 94 °C	(DIN 52 011)
Viscosity	Ca. 10 000 mPas	At 140 °C (following DIN 53 211)
Density	Ca. 0,98 g/cm³	
Solid content	100%	
Working temperature	375F/190C	
Size		

PACKAGING

Cartridges **STORAGE**

Can be stored in tightly closed original containers, cool and dry (15 – 25 °C) for 12 month

SAFETY INSTRUCTIONS

See safety data sheet

REMARKS

The details in our construction sheets and other publications are provided to the best of our knowledge. Their contents are not, however, legally binding. In all cases, we recommend that preliminary tests are carried out by the customer. In all other respects, our General Terms of Sale apply.
