£35.99

Geopacks Compact 4 Section Heavy Duty Ranging Pole

This compact ranging pole is used for measuring gradients and often used in conjunction with clinometers. Can be used for marking out lines, alignment or indicating boundary areas and it can be used along with levels, theodolites and clinometers. The pole has four black and white 0.5 metre sections (total of two meters) which can be joined by simply plugging together. Ideal for field trips as it folds down and fits into a rucksack, car or mini-bus!

Geopacks Stream Flowmeter

Best Seller

£149.99

For measuring the rate of flow of a stream. Fitted with a re-settable LCD counter and powered by long-life batteries (included), the Flowmeter also comes with:

- Protective carrying pouch.
- Sturdy impeller stick.
- Compact, weather-proof carrying case for the whole kit.
- 30-page book containing technical specifications, instructions for use, care and maintenance, conversion and calibration charts and useful guidance on carrying out interesting field work projects.
- + 3 (FREE) stream bed elevation rods, which allow velocity measurements to be made at fixed heights above the bed of the stream – with 3 interchangeable vertical sections of 75mm, 120mm and 240mm; all 3 sections have a full length of 450mm.

If you are still measuring stream flow with an orange (and multiplying by 0.6) then this flowmeter could be just the piece of kit for you. Ideal for school and college field trips, student projects, practical river irrigation studies, and water resource management.

Buy 3	£127.49	15% off
Buy 6+	£104.99	30% off

How Does it Operate?

Revolutions of an impeller are sensed electronically and transmitted to a hand-held counter unit. The number of revolutions per unit of time can be translated into stream flow velocity using a conversion chart. Our impeller sticks have been accurately calibrated in a flume tank.

12 month guarantee on all Geopacks Flowmeters

● + ZMFP51

See page 6 for the Advanced Flowmeter

Service, Repair & Upgrade

Geopacks flowmeters are supplied with a full 12 month guarantee and if products do not immediately meet your expectations, your purchase will be refunded.

Advanced Flowmeter with Temperature Gauge

If you're looking to upgrade your stream measuring equipment for field trips, or you're still using the orange peel method to monitor the rate of flow, then take a look at our Advanced Flowmeter - now with a temperature sensor!

Our all-time Best Seller got an upgrade! The Advanced Flowmeter includes all the features you know and love, with an added internal and external temperature thermometer.

It connects to a sturdy impeller stick and boasts a sophisticated operation that does away with the need for conversion charts. Powered by standard AA battery (included), the Flowmeter also comes with:

- Carrying pouch for added protection
- Collapsible impeller stick
- Compact case for transporting and storing the whole kit
- Instruction booklet containing technical specifications

Flow Operation:

Measure the rate of flow of a stream. The Flowmeter displays velocity in units of metres per second (m/s) or miles per hour (mph) and has an inbuilt logger. Internally, the meter now incorporates an integrated 4MB flash-drive which can record up to 500,000 flow readings into a CSV file. Even if the batteries fail or the meter loses power, all your important readings will safely remain within the flash-drive until power is restored. As a result of customer feedback the operation is very tactile, as the individual control keys give a solid 'click' when pressed.

Waterproof carrying pouch for extra protection

Collapsible impeller stick

Waterproof compact to transport and store the whole kit

Fast Delivery

Stock items can be supplied within one working day. A few items may take longer.

Satisfaction Guaranteed

Defective goods or those not meeting with your total satisfaction must be returned within 30 days of receipt for exchange or refund. Non-receipt of goods as invoiced must be notified to us within 30 days of invoice date.

Invoice and Payment

Invoices can be issued against purchases made by UK educational institutions where accompanied by written orders and/or order numbers.

Payment Options

Purchases from private individuals, schools or companies should be accompanied by payment. Visa and Mastercard are accepted, however credit cards will incur a 3% admin fee. Credit card users should give the card-billing address and a day-time telephone number as well as a delivery address. Payment by BACs is accepted and details can be provided. Payment must be received before dispatch of goods.

Product Changes & Pricing Policy

As part of our commitment to continuous product development, we reserve the right to change product specifications and, if necessary, substitute alternative items of similar character and value. Prices are correct at time of publication, but we reserve the right to alter prices if necessary.

Geopacks: Made in the UK

Geopacks branded products are designed and manufactured in the UK by All Jigsaw Puzzles Ltd. Manufactured in Devon.
