CHOOSE THE RIGHT SIZE RUG FOR YOUR LIVING ROOM

If you are measuring for a rug for a room in your home that has furniture in it, for example, your living room or family room, the furniture should be all on the rug. The exception to this would be the back legs of your sofa or larger chairs.

These legs can be off the floor if desired.

Smaller sizes such as **4 x 6**, **5 x 7** area rugs can be placed under a coffee table to define a seating area.

Larges rugs such as **8 x 10**, **9 x 12** and **10 x 14** are recommended sizes based on the dimensions of the your room.
