

In Tune 2

6W USB Soundbar

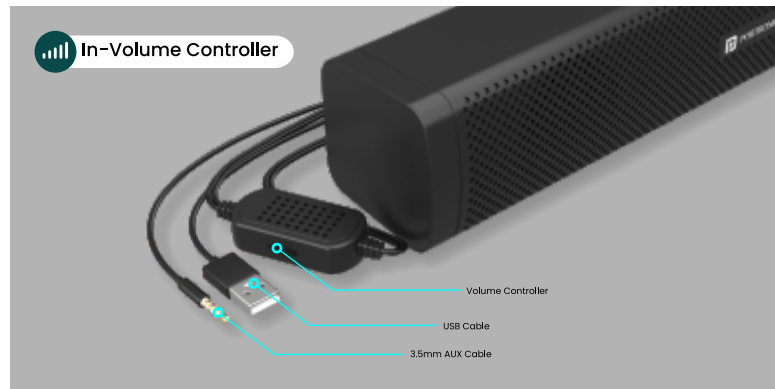

Garble Free Audio: The soundbar works in an efficient manner to give out audio that's not garbled and also is very precise. The audio output differs according to pitch, frequency and several other factors but the audio remains garble free. This will definitely be a soothing experience as you tune into your device!

Crisp Audio: The audio output by In Tune 2 will make your listening experience better on a whole another level! The soundbar is equipped with smart audio tech that allows it to amplify sound and make it crisper on the frequency scale. The equalizers fed into the soundbar make this possible and every time you tune in the difference will be obvious.

Lucid Bass Quality: The moment you tune into your audio, the difference will be obvious! The audio frequency can go as low as 160 hz and the bass becomes lucid, deeper than it was before. The soundbar doesn't distort the audio effects even if the frequency is lowered and increased frequently, it remains distortion free!

In-Line Volume Controller: Control the volume of audio with the help of the knob built in the soundbar however you want it. The knob works fluidly and gives your precise portions of volume and frequency which just amplifies the listening experience by ounces. The volume fluctuations don't affect the audio output however it is consistent!

Portable and Elegantly Designed: The soundbar is lightweight, but sturdy which makes it the ideal travel partner for your audio requirements. You can literally carry it anywhere and use it even when the work space is limited. The sound bar is black in colour and has a matte finishing for the perfect aesthetical touch!
