

March 2020

Corona Virus

As you are very aware the Corona Virus could impact on the ability of some businesses and their supply chains to continue trading normally.

Viking Industrial Products Ltd have carried out an impact risk assessment and consider the risk to us and our ability to supply you as extremely low risk. We have put in place measures to ensure the continued supply of our products to you, just as we did throughout the Brexit uncertainty.

We have significantly increased our stock holding of products. We carry out high standards of hygiene within the office and forward regular Government advice to our team on ways to keep themselves informed and best protected.

Every member of the Viking team are multi-disciplined and can step into a new role at any given time without interruption.

I would like to assure you that everyone at Viking are playing their part to ensure that we are able to continue with business as normal in these unprecedented times.

Yours faithfully

VIKING INDUSTRIAL PRODUCTS LTD

Melanie Bennett
