VKSS08/12/23

Self Adhesive PTFE Coated Glass Fabric Tool Release Sheet

- PTFE coated glass fabric tool release sheet is used to line moulds to give a durable, non contaminating release surface. It is also used to cover patterns, prior to the lay up of composite moulds
- Supplied with either a pressure sensitive silicone or acrylic adhesive backing
- Imparts a smooth surface finish on the cured laminate
- Self adhesive PTFE coated glass fabrics can only be applied in one piece to flat or single curvature tooling, however the material can be effectively butt jointed on complex tooling
