MEASURING GUIDE

STEP 1: TAKE YOUR CAT'S 'FRONT' AND 'BACK' MEASUREMENTS

Each measurement is made all the way around your cat. Use a cloth tape measure or piece of string, and make sure you draw it tight enough around your cat for any fur underneath to be compressed.

1. FRONT - Measure from your cat's shoulderblades, around the front of their breastbone, and back again.

2. BACK - Measure from your cat's shoulderblades, around the back of their front legs, and back again. The tape measure should pass behind their elbows.

STEP 2: COMPARE YOUR CAT'S MEASUREMENTS WITH THE SIZE CHART

If your cat is on the cusp of two sizes, **please choose the smaller of the two**. And if you need any advice at all with sizing, simply send us a message at hello@supakit.co, and we'll be happy to help!
