

Find Your Ring Size

To find your ring size, print this page at 100% and match one of the circles below with the inside of one of your rings. If your ring size falls between two of the circles, it is a half size. (Example: If your ring falls between circles 6 and 7 below, your ring size is 6 1/2.)

Please be sure that these rulers measure two inches or twenty millimeters, respectively, when printed for accurate sizing.
