

C Larboard Launches Defiance Tools™ Folding Electric Bicycle

In time for Earth Day 2018, with a top speed of 15 miles per hour and a range of 18-27 miles, C Larboard launches the Defiance Tools B2 Folding Electric Bike.

ORLANDO, FLORIDA, UNITED STATES

, April 5, 2018 /EINPresswire.com/ --

With the launch of the Defiance Tools B2 Folding Ebike, living an eco-friendly lifestyle just got a whole lot easier and a lot more fun. [Electric bikes](#) provide all of the advantages of riding a regular bicycle, like zero emissions, freedom and fun, but without all of the work and with increased efficiency. From city dwellers and tiny house aficionados to college kids and commuters, the Defiance Tools B2 folding [electric bicycle](#) is the perfect transportation tool for people of all ages who are looking for ways live an eco-friendly lifestyle.

For Richard Coulcher, part of the husband and wife team that founded C Larboard, folding bikes invoke fond memories. “When I was a kid, my dad bought our family folding bikes from a now-defunct department store chain,” he explains, “this was the mid 70’s and the bikes were imported from Italy. By folding them in half, they fit nicely in the back of the station wagon, with all of us kids and pets and everything, for our trip to the summer lake house.”

“

This Transportation Tool defies the idea that going green is inefficient, expensive or boring.”

Zoé Coulcher, Co-Founder, C Larboard

For Coulcher, the folding bike represented spending time with family and creating fond memories. It also represented an ingenious way to increase space. Coulcher never quite forgot about that folding bike and in fact, it was a part of the reason his career has taken him down the product development consulting path. Coulcher’s folding bike he had as a kid is a part of the story that led him and his wife Zoé Coulcher to develop their Defiance Tools line of products and their B2 Folding Electric Bikes.

An environmentally friendly Transportation Tool to help you navigate life.

With an aerospace grade aluminum alloy frame and weighing just under 33 pounds, when folded the ebike is just under 25 inches long and under 20 inches high. Powered by a 36V 250W brushless DC motor with a top speed of 15 miles per hour, a charging time of only 3-4 hours is needed. Depending

on riding style, rider weight, road surface, and grade the Defiance Tools [folding electric bike](#) has a range of 18-27 miles. The LCD display, front and rear disk brakes, impeccable design and quality manufacturing all combine to create an easy and eco-friendly riding experience.

About C Larboard:
