TELEPHONE NUMBER +44 (0)1728 832880

FAX NUMBER +44 (0)1728 832881

Newton Commercial was formed in 1979 by myself Richard Newton and my wife, Vera Newton to manufacture interior trim for British Classic cars. Right from the start we concentrated all our efforts on the post-war BMC range of cars. During the 1980 period we developed original specification trim for Morris Minors, Minis, Triumph Spitfire, GT6, Herald, Vitesse, the TR range as well as MGA, MGB and lately the MGF + New Mini.

Having been in the Motor trade all of my working life, I served my Apprenticeship at Morris Motors in Cowley, then spent a year at the BMC Competitions Department at Abingdon helping to prepare the Works race and rally cars. Moving then to Downton Engineering near Salisbury as Sales Manager to Bunty and Daniel Richmond, I then moved to Germany to manage the Wooding Hamburg Racing Team who ran Mini Coopers and then Ford Escort BDA's in the

European Championship. On returning to England in the mid 70's, I spent several years with Serck Services, the Radiator people, before Vera and I set up Newton Commercial from our semi detached house outside Ipswich.

Today, the Company has a large 20,000 square foot purpose built Factory in Leiston, Suffolk employing over 40 skilled craftsmen and women. All aspects of cutting, sewing, panel trimming and carpet moulding are carried out using the latest up to date technology available to our industry. The Company is an approved trim manufacturer for British Motor Heritage Ltd., whose other approved workshops and wholesalers throughout the world continually monitor the quality of our goods. The Company is also very pleased to have been awarded the "Investor In People" certificate for the third time since the inception of the scheme in the mid 1990's.

ABOUT THIS BROCHURE

We first started manufacturing interior trim for the Morris Minor in 1980 and over the following years we have developed and marketed virtually every piece that was originally fitted to these cars. Right from the start it was decided by Vera and myself that it was only possible to take on this project if we actually remanufactured these items to their original specification. Consequently, all materials have been specially commissioned to the original colours, grains and textures.

Apart from giving you graphic style drawings for every model, we have also made every effort to give you colour pictures so that you can recognize your requirements and see our quality as well.

Apart from the original specification items you will see listed, we have also recently developed certain items that we believe will enhance your Morris Minor as well. Our Suffolk reclining seats have proved very successful as they not only give increased comfort for long journeys but also look great and are a safety feature. Our latest development is our new Deluxe carpet sets, which have the tunnel sections, moulded to fit exactly. They are much easier to fit and really look the business!

We hope you enjoy our brochure and we look forward to being of service to you.

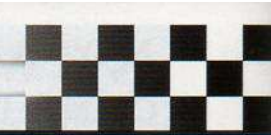

INVESTOR IN PEOPLE

BRITISH MOTOR HERITAGE APPROVED

A SNAPSHOT OF MORRIS MINOR SEAT DESIGNS FROM 1949 TO 1971

MM Series 1949-53

Series II 1953-56

Minor 1956-59

MADE IN ENGLAND

Minor 1960-62

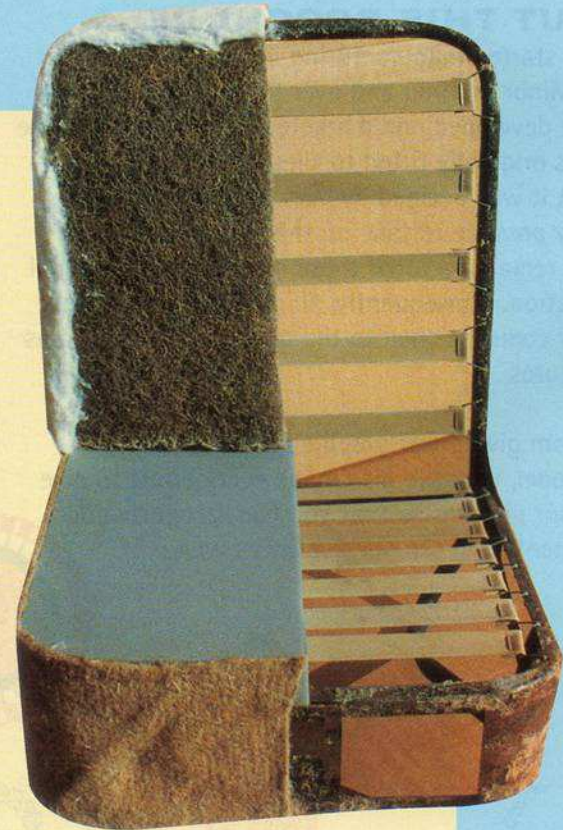

Minor 1962-64 Duotone Style

Minor 1964-71

Our new seat covers fitted with a complete trim kit 1964-71

Typical seat make up of the internal items required for cars from 1956- 1971

We are utilizing new MG Rover components to make these seats in conjunction with seat covers. The seats have the latest in reclining and tilting mechanisms and twin post headrests.

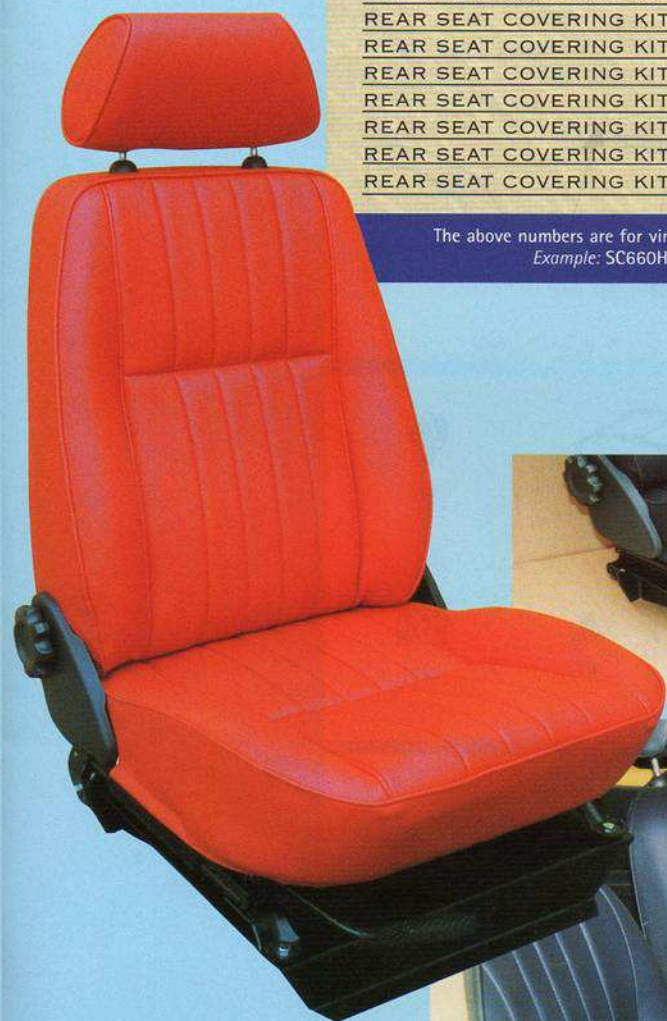

The seats come with a special subframe to fit the Minor floor exactly and also seat runners which move approximately 7" front to back movement. The subframe picks up the original front bolt holes in the floor and for total rigidity, two holes need to be drilled in the floor to hold the rear of the subframe in place. M8 or M10 x 30mm long Nylock nuts & large washer for under floor.

The seats can be ordered in original Minor trim colours to match either existing trim or new trim supplied by Newton Commercial.

The seats on the MM models are extremely comfortable and considered by some to be the best ever designed for the Morris Minor. Originally these seats were covered in Rexine with contrasting coloured piping but after a short period of production leather seat facings were introduced. We can offer you a seat covering kit in either vinyl or leather to original specification in Maroon, Suede Green or Beige. Because of the complexity of these seats, we would strongly recommend that an experienced car trimmer fit these seat covers for you as the internal fixings and general fitting of the front seat covers is a specialised job. Most MM models had a decorative chrome strip on the door panels please retain your old units as these items are no longer available. Early cars had chain type door pulls - please send your old pulls and we will recover them for you. This also applies to the rear door pulls on 4-door models. Later cars were fitted with a more conventional type of door pull as illustrated. We do not list a headlining kit for this model, but please contact us for advice on this item. We would suggest you contact us before actually ordering parts for this model, as there are certain intricacies that need to be discussed.

In the main the main trim panels on the Series II models were identical to those fitted to the earlier MM cars, but the seat design and construction changed slightly as can be seen here. The carpets although looking very similar were of different design as well. The Traveller series was also introduced at this time and you will see the necessary parts we manufacture for this model alongside the saloon parts. Although the front seats on all Series II vehicles look the same, early seats produced in 1953 did not have the more conventional envelope style squab cover, but a cover that was basically tacked to the seat frame and then a vinyl covered fibreboard backboard which in turn was also tacked onto the frame. The only physical way of checking to see which type of seat you have is to examine the back of the squab near the rear piping. If there is a "decorative" stitch line just below this piping on the back panel then this is the early type seat. The base covers are the same for both types. You will note that we have listed headlining kits. These are not for early cars with the plywood type headlining but for later cars with conventional hooped linings. Although we mention the rear 4 door armrest recovering kit, we would suggest you send your old units to us for recovering, as this can be quite tricky.

With the introduction of the Minor 1000 in late 1956 a completely new front seat frame was used with "modern" internal foams and seat straps. Originally "Deluxe" cars usually had leather faced seat covers, whereas "standard" cars had vinyl seat covers. It is possible, however, to find cars fitted with leather front and vinyl rear seats. Contrasting light grey coloured pipings were also used in this period, although we have come across many cars fitted with self-coloured pipings. Most front seats during this period were "fixed" but in 1959 it is possible to find passenger seats that "fold" down. This allowed better access on 2 door models to the rear seats. Other changes on this range included a new larger parcel tray usually with a heater duct fitted, which actually enclosed the round heater unit but it is possible that certain cars had just a parcel tray. A foamed crash pad was also added to the front of the parcel tray. We are offering two types of headlining material for all models, one being a creamy beige with a light brown fleck and the other a very light grey with matching sunvisors. Please note from the illustration there are two types available, one with a central fixing bracket and the other which is a large pad and has brackets fitted at either end.

In the autumn of 1959 the seat design was changed again to incorporate larger fluted facing panels on both the front and rear seats. The passenger seat was of the "folding" type again on 2 door models and both leather and vinyl seats were offered. The design on the door panels was also altered to give them more character. The specification of this model was the same as the 56-59 cars.

MAROON

LIGHT BLUE

BISCUIT

For the October 1961 Motor Show in London, BMC introduced a much face lifted Minor range and amongst many modifications to the body, the interior design was completely changed. The 1960's new pastel colour scheme was introduced which stayed in production until the Minor was finally withdrawn in the early 1970's. Cherokee Red, Blue Grey and Porcelain Green were the new colours with the addition of Beige "Duotone" contrasting material used on the seats and trim panels. This design was used on all deluxe models, but standard models did not have the "Duotone" inserts. The dash board was also altered, consequently the shape of the glove boxes was different to previous models as well as having a chromed finishing strip right round the leading edge. At this time the Travellers were supplied with black painted fibreboard panels under the rear load area to hide the spare wheel situated underneath.

PORCELAIN GREEN

CHEROKEE RED

BLUE GREY

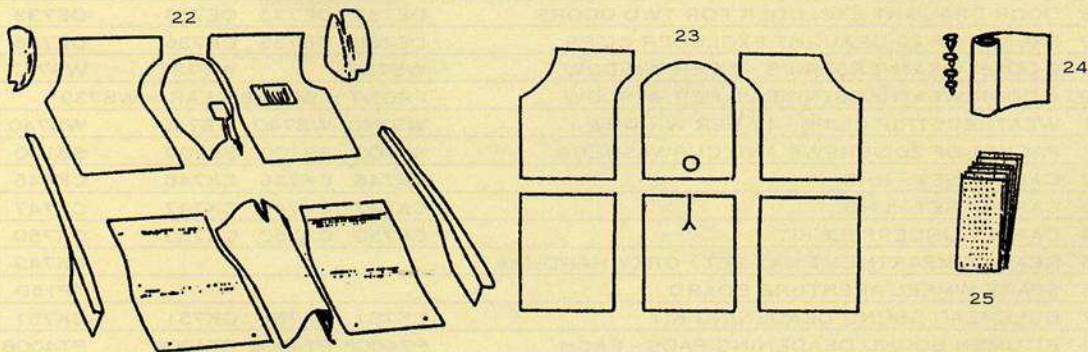

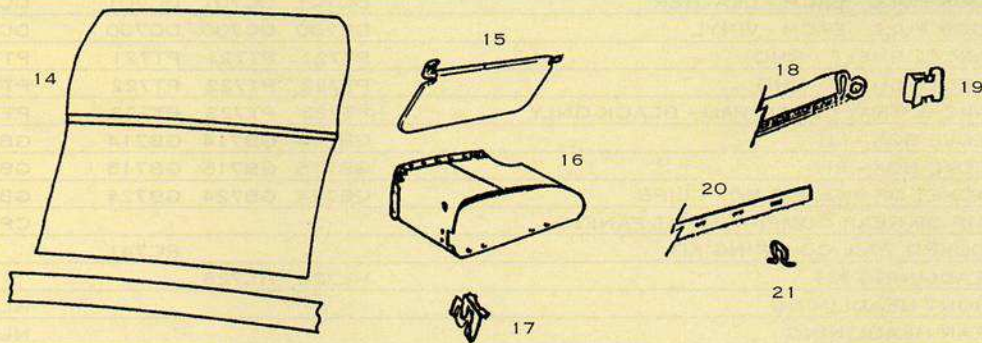

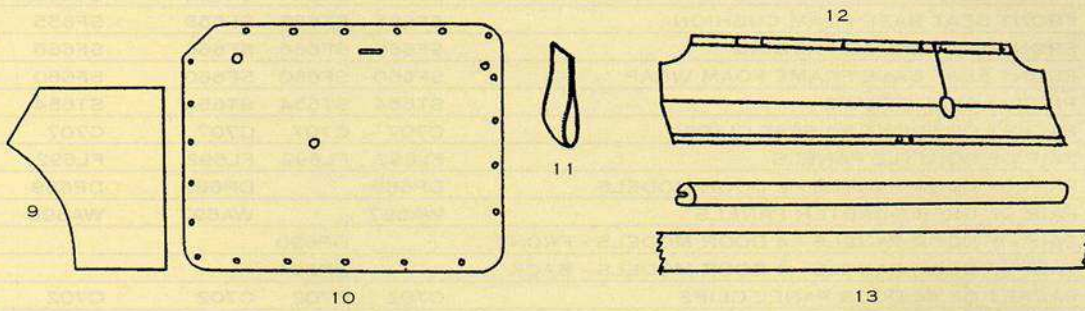

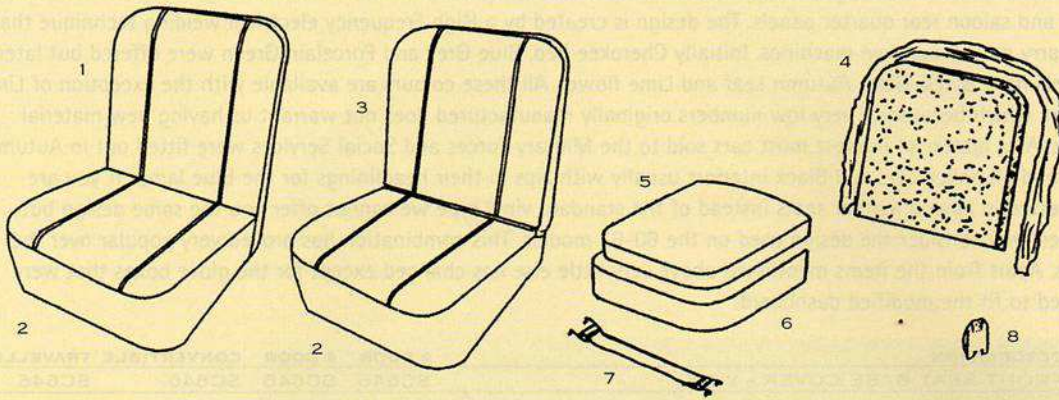

The final interior trim design came in late 1963 with the introduction of heat formed designs on all seat covers, door and saloon rear quarter panels. The design is created by a High Frequency electrical welding technique that we carry out on our own machines. Initially Cherokee Red, Blue Grey and Porcelain Green were offered but later models have Black, Navy, Autumn Leaf and Lime flower. All these colours are available with the exception of Lime flower, which because of very low numbers originally manufactured does not warrant us having new material made. As a matter of interest most cars sold to the Military Forces and Social Services were fitted out in Autumn Leaf and all police cars had Black interiors usually with zips in their headlinings for the Blue lamp! If you are interested in having leather seats instead of the standard vinyl type we cannot offer you the same design but suggest you consider the design used on the 60-62 models. This combination has proved very popular over the years. Apart from the items mentioned above very little else has changed except for the glove boxes that were altered to fit the modified dashboard.

MINOR VAN & PICK UP

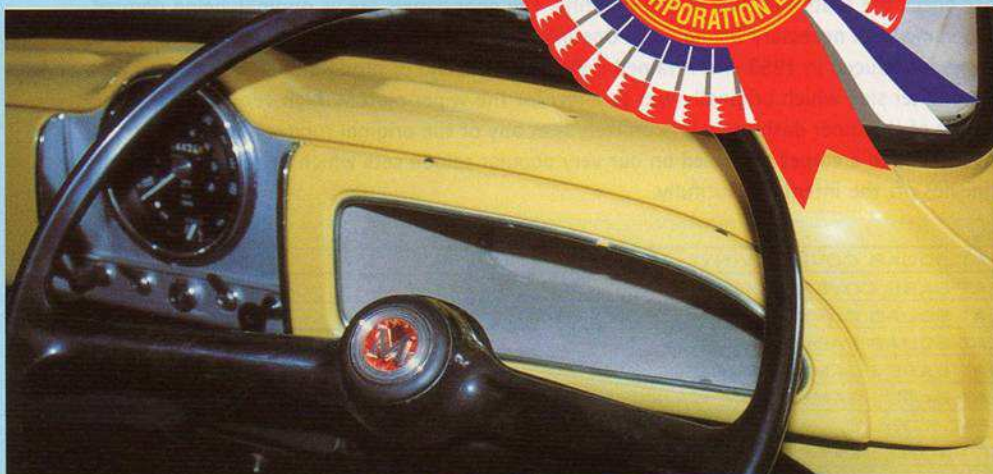

Vans and Pickups were obviously the workhorses of the Minor range and in their day were used not only by the Butcher, Baker and Candlestick maker but also by Farmers and huge organisations like the Post Office and the Armed Forces. Consequently the interior trim was functional and fairly basic and usually only came in two colours namely black and brown. We can only offer trim for these cars in black, as the demand for the brown is too low for us to warrant the expenditure on having new material manufactured. There were various seat designs over the years, but the most popular today is the later style that has two simulated stitch weld designs on the seat cover faces as illustrated. It is usual to find that the passenger seat is of the folding type but it is possible to have two fixed seats so please check the seats carefully before ordering. The door panels are as original, being painted black hardboard and come with necessary fitting clips. One interesting feature on these models is that the very early style glove boxes introduced in 1953 was retained right up to the end of production. These boxes had a scallop cut out of the outer side which originally was to allow for the wiper motor which very early on was situated on the outside of the inner dash area. It is unlikely that any of the original rubber floor mats are still available so we have designed a carpet set based on our very popular saloon sets which in conjunction with our other new items finishes off the interior beautifully.

DELUXE CLASSIC CARPET SETS

1956-71 MODELS

Our brand new deluxe moulded carpet sets now include moulded tunnel carpets which fit around the whole tunnel section like a glove.

We also supply an underfelt kit to go underneath these new items. There are no longer any ugly seams on the tunnel carpets and the moulded handbrake section hides the handbrake cables.

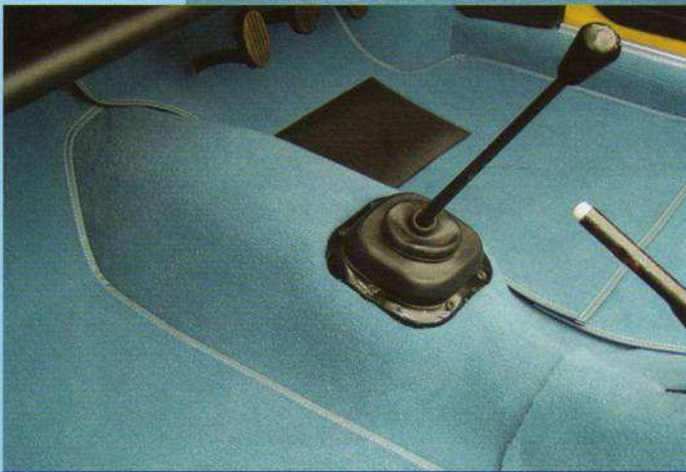

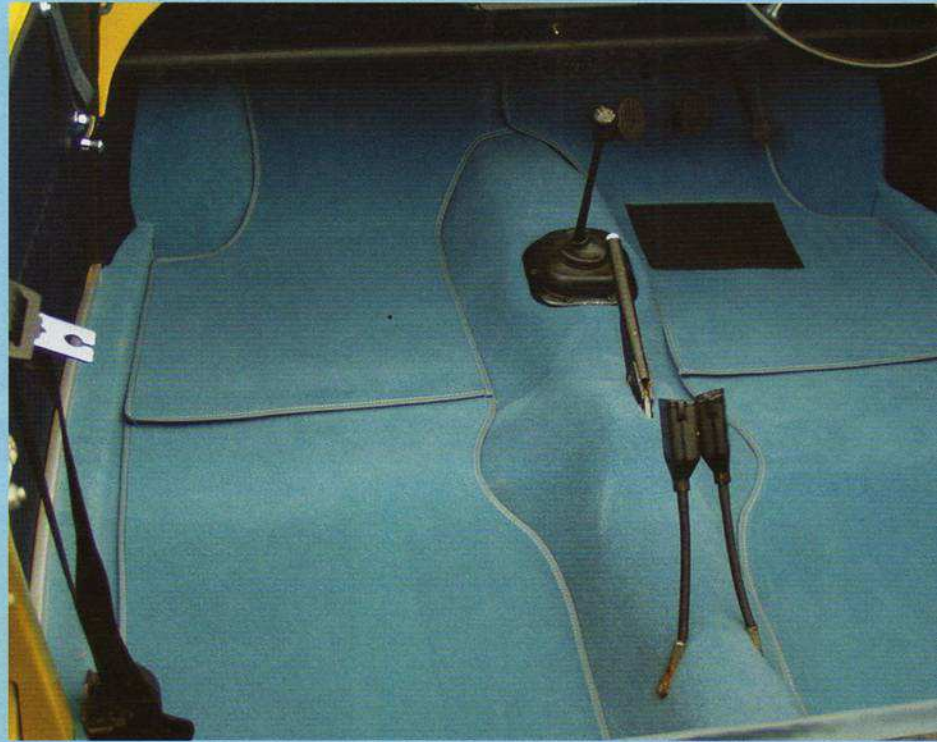

The floor mats have a special PVC backing which not only makes them more hard wearing, but also waterproof from underneath.

The rest of the 11 piece kit is not PVC backed for easy installation. We supply a set of carpet clips as well as easy to read fitting instructions.

COLOURS AVAILABLE

BLUE GREEN DOVE GREY RED BLACK

(We cannot offer Brown or Navy in the moulded style as the make of these colours does not mould successfully. However, we can offer these colours in our previous style with seamed tunnel sections. As these colours are made from a tufted piled material these seams will not show.)

CLOSE UP VIEWS OF NEW MOULDED SECTIONS

1949-56 MM & SERIES II MODELS

We are not offering the moulded style carpet sets for these models, only original designs. If you look at pages 6 & 8 you will note the design for each model is slightly different. These designs are original.

COLOURS AVAILABLE

RED GREEN BLACK BROWN GREY

SALOON BOOT FLOOR CARPET WITH FIXINGS INCLUDED

COMPLETE INTERIOR TRIM KITS

The beauty of purchasing one of our 'Complete trim kits' is that not only do you receive everything to rebuild your interior but you will know that all the colours match because everything is brand new. The other great advantage is that when buying one of these kits there is a price saving of approximately 10 per cent.

Many customers now are replacing their front seats with our modern recliners mentioned earlier and purchasing them in conjunction with the complete interiors. If you wish to do this, please contact us so that we can advise you on a special price.

You may want to replace your original vinyl seats with leather covers – please see our price list for relevant details.

SEAT REBUILDING AND INTERIOR FITTING

We can also offer a seat refurbishment service. If you cannot get your seats delivered to us, we can arrange collection from your address, strip them down, inspect the frames, repair where necessary, repaint them and fit new covers, foams, straps, etc. Please contact us initially so that we can quote you the carriage and fitting charges.

We can also retrim your car if you wish. We generally only offer this service during the winter period (October–February), so that we can guarantee a reasonable turnaround. We would normally require your car for about two working weeks for a full retrim. Please contact us initially to discuss dates and costs involved.
